

Supplementary

Table S1. Observed translocations and inversions per 200 cells for whole chromosome 1, 2 and 3 dGH paints and estimated bone marrow doses (mGy).

| | Number of Participants | Location exposed | Observed Translocations per 200 cells | Observed Inversions per 200 cells | Estimated bone marrow dose (mGy)* | Estimated bone marrow dose (mGy) with correction for <MMD** |

| | | NTS/PPG | 20 | 25 | -130 | 160 |

*Based on inverse-variance weighted translocation and inversion dose, without correction for MDD)

**one-half MDD imputed for biodose estimates <MDD (depends on smoking status)
