

Additional File 1

Additional File 1. Effect of C+P on myeloid cell infiltration. Gating strategy and representative flow cytometry plots showing myeloid (CD11b⁺), gMDSC (CD11b⁺Ly6G⁺), mMDSC (CD11b⁺Ly6C⁺), double negative (DN : CD11b⁺Ly6G^{neg}Ly6C^{neg}) and macrophage (CD11b⁺Ly6G^{neg}Ly6C^{neg}F4/80⁺) cell infiltration of TC-1 genital tumors at day 13 after C+P treatment or left untreated.
