

Additional File 2

A

B

Additional File 2. Effect of C+P on circulating myeloid cells. A: Gating strategy and representative flow cytometry plots showing myeloid (CD11b⁺), gMDSC (CD11b⁺Ly6G⁺), mMDSC (CD11b⁺Ly6C⁺) and double negative (DN, CD11b⁺Ly6G^{neg}Ly6C^{neg}) cells in whole blood of mice bearing day 13 TC-1 genital tumors after C+P treatment or left untreated. B mean and individual percentages of the indicated myeloid cell subtypes among CD45⁺ cells.
