

Authors response to reviewers and editors

(Plant Direct)

Reviewer #2: The manuscript has been improved through the changes made to the earlier version. There are still a few minor things that need attention

Reviewer comments	Authors response
Figure 1 it is a little hard to see the difference between the control and waterlogged - maybe put these in different colours rather than black and grey so they stand out a little more - at least for the on-line version if not the print copy?	Figure 1 is now available in colour
Pg10 and elsewhere should htseq be HTSeq throughout?	corrected
P25-26, table 5 - tubby is usually in capitals ie., TUBBY, TUBBY-like	done

Editor comments

In addition to the minor edits indicated by the reviewer, please check the reference section for the italicization of the species names suggested by the reviewer previously.	done
When changing "HTSeq Count" (Instead of htseq) please note it also needs to be changed in the footnotes of the tables, in addition to the locations suggested by the reviewer.	corrected
