

**SUPPLEMENTARY TABLE 1. Cerebrospinal Fluid Testing before Definitive Diagnosis**

Date	10/2002	11/2002	3/2007	11/2007	2015	2017
Meningitis status	Relapse	Remission	Relapse	Remission	Relapse	Relapse
Medications	None	Rifampin, pyrazinamide, ethambutol, valacyclovir	None	Isoniazid, rifampin, moxifloxacin, ethambutol, steroids	Prednisone 20 mg	Prednisone 33.75 mg
Glucose, mg/dl	23		10	50	179	47
Protein, mg/dl	96		132	34	13	41
RBC, cells/ $\mu$ l	12	1		2	1,075	156
WBC, cells/ $\mu$ l	60	147	130	5	9	30
Lymphocytes, %	25	83	83	0	78	92
Monocytes, %	60	16	13	100	0	4
Neutrophils, %	15	0	2	0	22	4
Eosinophils, %	0	1	0	0	0	0
Infectious tests	MTB PCR, AFB, bacterial, viral, and fungal cultures, HSV and VZV PCR, <i>Coccidioides</i> Ab, histoplasma Ag, crypto Ag, VDRL	VDRL, AFB culture, <i>Coccidioides</i> Ab	MTB PCR, AFB culture, crypto Ag, bacterial and fungal culture, HSV1 and 2, CMV, VZV, EBV, and HHV6 PCRs	MTB PCR, crypto Ag, bacterial, fungal, and AFB cultures	Crypto Ag, fungal cultures	AFB culture, histoplasma Ag, Lyme Ab, VZV, HSV, HHV6, EBV, and CMV PCRs
Other tests			Cytology, flow cytometry	Cytology, flow cytometry	IgG index elevated	IgG index elevated, partially identical oligoclonal bands in CSF and serum, cytology

Tests listed were negative or normal unless otherwise indicated.

Ab = antibody; AFB = acid-fast bacilli; Ag = antigen; CMV = cytomegalovirus; crypto = cryptococcal; CSF = cerebrospinal fluid; EBV = Epstein-Barr virus; HHV = human herpes virus; HSV = herpes simplex virus; MTB = *Mycobacterium tuberculosis*; PCR = polymerase chain reaction; RBC = red blood cells; VDRL = Venereal Disease Research Laboratory (test for syphilis); VZV = varicella zoster virus; WBC = white blood cells.
