Reporting Summary

Nature Research wishes to improve the reproducibility of the work that we publish. This form provides structure for consistency and transparency in reporting. For further information on Nature Research policies, see <u>Authors & Referees</u> and the <u>Editorial Policy Checklist</u>.

| Sta | atistics | | | | | | | |
|--|---|--|--|--|--|--|--|--|
| For | all statistical analys | es, confirm that the following items are present in the figure legend, table legend, main text, or Methods section. | | | | | | |
| n/a | Confirmed | | | | | | | |
| | The exact sam | pple size (n) for each experimental group/condition, given as a discrete number and unit of measurement | | | | | | |
| | A statement o | on whether measurements were taken from distinct samples or whether the same sample was measured repeatedly | | | | | | |
| | The statistical Only common to | test(s) used AND whether they are one- or two-sided ests should be described solely by name; describe more complex techniques in the Methods section. | | | | | | |
| | A description | of all covariates tested | | | | | | |
| | A description | of any assumptions or corrections, such as tests of normality and adjustment for multiple comparisons | | | | | | |
| | A full description of the statistical parameters including central tendency (e.g. means) or other basic estimates (e.g. regression coefficient) AND variation (e.g. standard deviation) or associated estimates of uncertainty (e.g. confidence intervals) | | | | | | | |
| \boxtimes | For null hypothesis testing, the test statistic (e.g. <i>F</i> , <i>t</i> , <i>r</i>) with confidence intervals, effect sizes, degrees of freedom and <i>P</i> value noted <i>Give P values as exact values whenever suitable.</i> | | | | | | | |
| \boxtimes | For Bayesian analysis, information on the choice of priors and Markov chain Monte Carlo settings | | | | | | | |
| \boxtimes | For hierarchical and complex designs, identification of the appropriate level for tests and full reporting of outcomes | | | | | | | |
| \boxtimes | \square Estimates of effect sizes (e.g. Cohen's d , Pearson's r), indicating how they were calculated | | | | | | | |
| | | Our web collection on <u>statistics for biologists</u> contains articles on many of the points above. | | | | | | |
| So | ftware and c | ode | | | | | | |
| Poli | cy information abou | ut <u>availability of computer code</u> | | | | | | |
| D | Data collection No software used | | | | | | | |
| Data analysis As given in the manuscript | | As given in the manuscript | | | | | | |
| | | om algorithms or software that are central to the research but not yet described in published literature, software must be made available to editors/reviewers. deposition in a community repository (e.g. GitHub). See the Nature Research guidelines for submitting code & software for further information. | | | | | | |
| Da | ta | | | | | | | |
| All | manuscripts must i - Accession codes, un - A list of figures that | ut <u>availability of data</u> include a <u>data availability statement</u> . This statement should provide the following information, where applicable: ique identifiers, or web links for publicly available datasets have associated raw data restrictions on data availability | | | | | | |
