

Supplemental Figure Legend

Supplementary Figure 1: Effect of Estrogen on α -ENaC and derlin-1 mRNA expressions.

The mRNA expressions of α -ENaC (A) and derlin-1 (C) was determined in mpkCCDc14 cells treated with 0.1, 0.5, 1, 10, 100 μ M E₂ by real-time PCR. The mRNA expressions of α -ENaC (B) and derlin-1 (D) were also examined as a function of time during the stimulation of mpkCCDc14 cells with 100 μ M E₂ by real-time PCR. Bars are means \pm SE from three independent experiments, * $P < 0.05$, ** $P < 0.01$ compared to Con.
