

Supplemental Fig. 3. Correlation of lactonase activity with body mass index (BMI) and waist circumference in women and men. Lactonase was not correlated with BMI (A) or waist circumference (B) in women. In men, lactonase was not related with BMI (C) but showed a significant negative relationship with waist circumference (D, $r = -0.275, p < 0.01$). All the values are expressed as Log_{10} .
