

**Supplemental Figure 1.** Histopathology showing fungal elements in the infected brain (GMS stain, 40x)

**Supplemental Figure 2.** Drug distribution in infected brain at 1 h after a single oral dose of isavuconazonium sulfate at 256 mg/kg. The signal intensity color bar is fixed for isavuconazole, with gradually increased intensity from blue (no signal) to red (max signal). H&E (right) staining of adjacent section is shown. Scale bar, 5 mm.
