

Table S3: Themes identified in respondent comments for an open-ended question regarding “other issues regarding patient mobility”

Theme	Frequency* n = 155
Equipment and safety	9 (6%)
Responsibility for mobility with PT/OT versus RN	9 (6%)
Time constraints	6 (4%)
Knowledge deficits	3 (2%)
Sedation	3 (2%)
Overweight and obese patients	3 (2%)
Coordination of care	3 (2%)
Lack of experience	2 (1%)
Day-shift versus night-shift issues; patient sleep	2 (1%)
Severity of illness	2 (1%)
Patients requiring restraints	1 (1%)
Unit culture	1 (1%)

Abbreviations: OT = Occupational Therapy. PT = Physical Therapy. RN = Registered Nurse

* Of all respondents (155), 29 made comments (19%), and some comments included more than 1 theme;

hence the sum is >29.
