

Supplemental Information

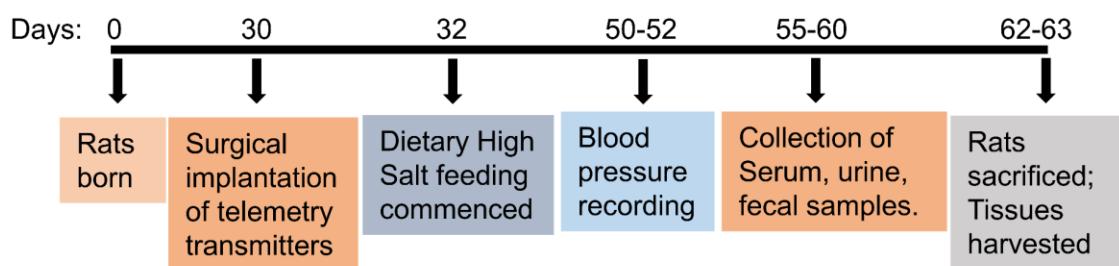

**Salt-Responsive Metabolite, β -Hydroxybutyrate,
Attenuates Hypertension**

**Saroj Chakraborty, Sarah Galla, Xi Cheng, Ji-Youn Yeo, Blair Mell, Vishal Singh, BengSan
Yeoh, Piu Saha, Anna V. Mathew, Matam Vijay-Kumar, and Bina Joe**

SUPPLEMENTAL FILES

Supplemental Figure 1

Timeline of the Salt Study

Timeline of the Nutritional Intervention Study

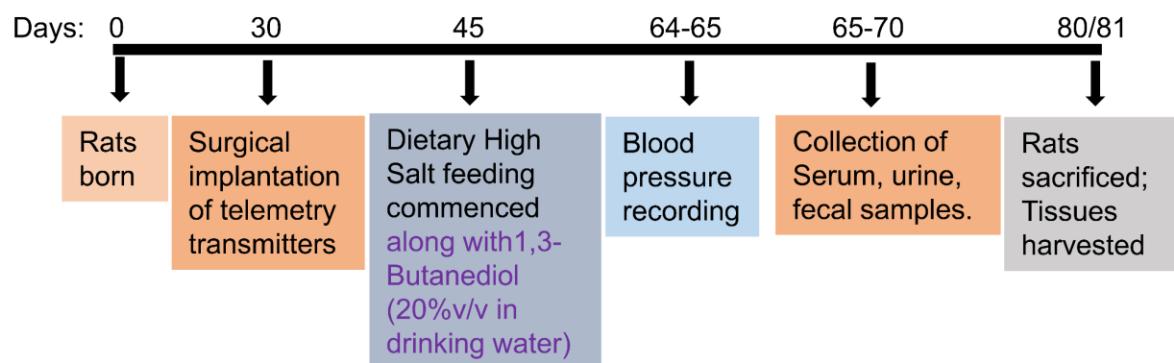

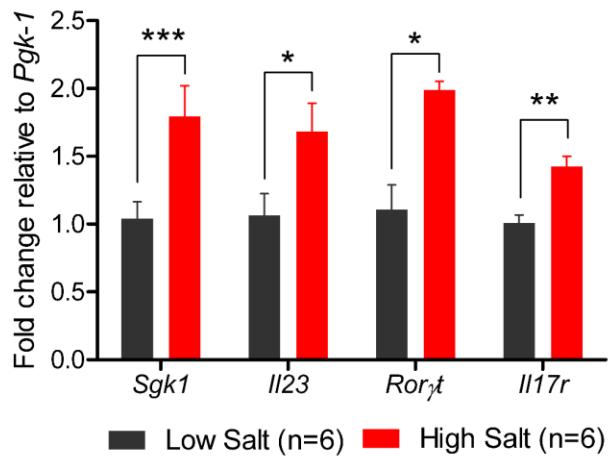

Figure S1. Timeline of the Salt and Nutritional Intervention study. Related to Figures 1 and 3.

Supplemental Figure 2

a.

b.

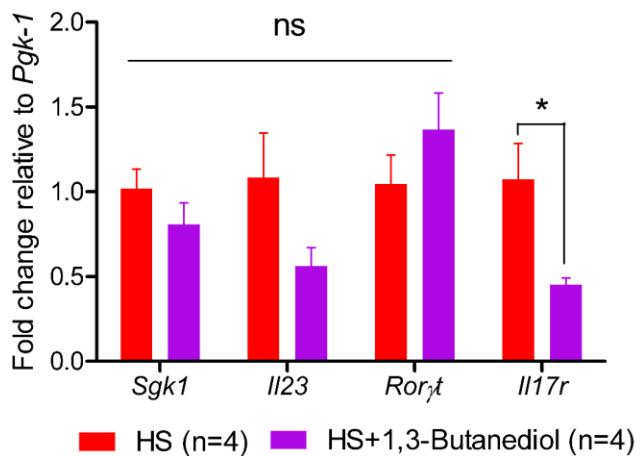

Figure S2. (a) Aberrant renal profile of markers associated with salt induced Th17 activation. * p<0.05, ** p<0.01, *** p<0.001. **(b) Effect of nutritional intervention with βOHB on renal profile of markers associated with salt induced Th17 activation.** HS: High Salt; ns: not significant, * p<0.05. **Related to Figures 4 and 5.**

Supplemental Figure 3

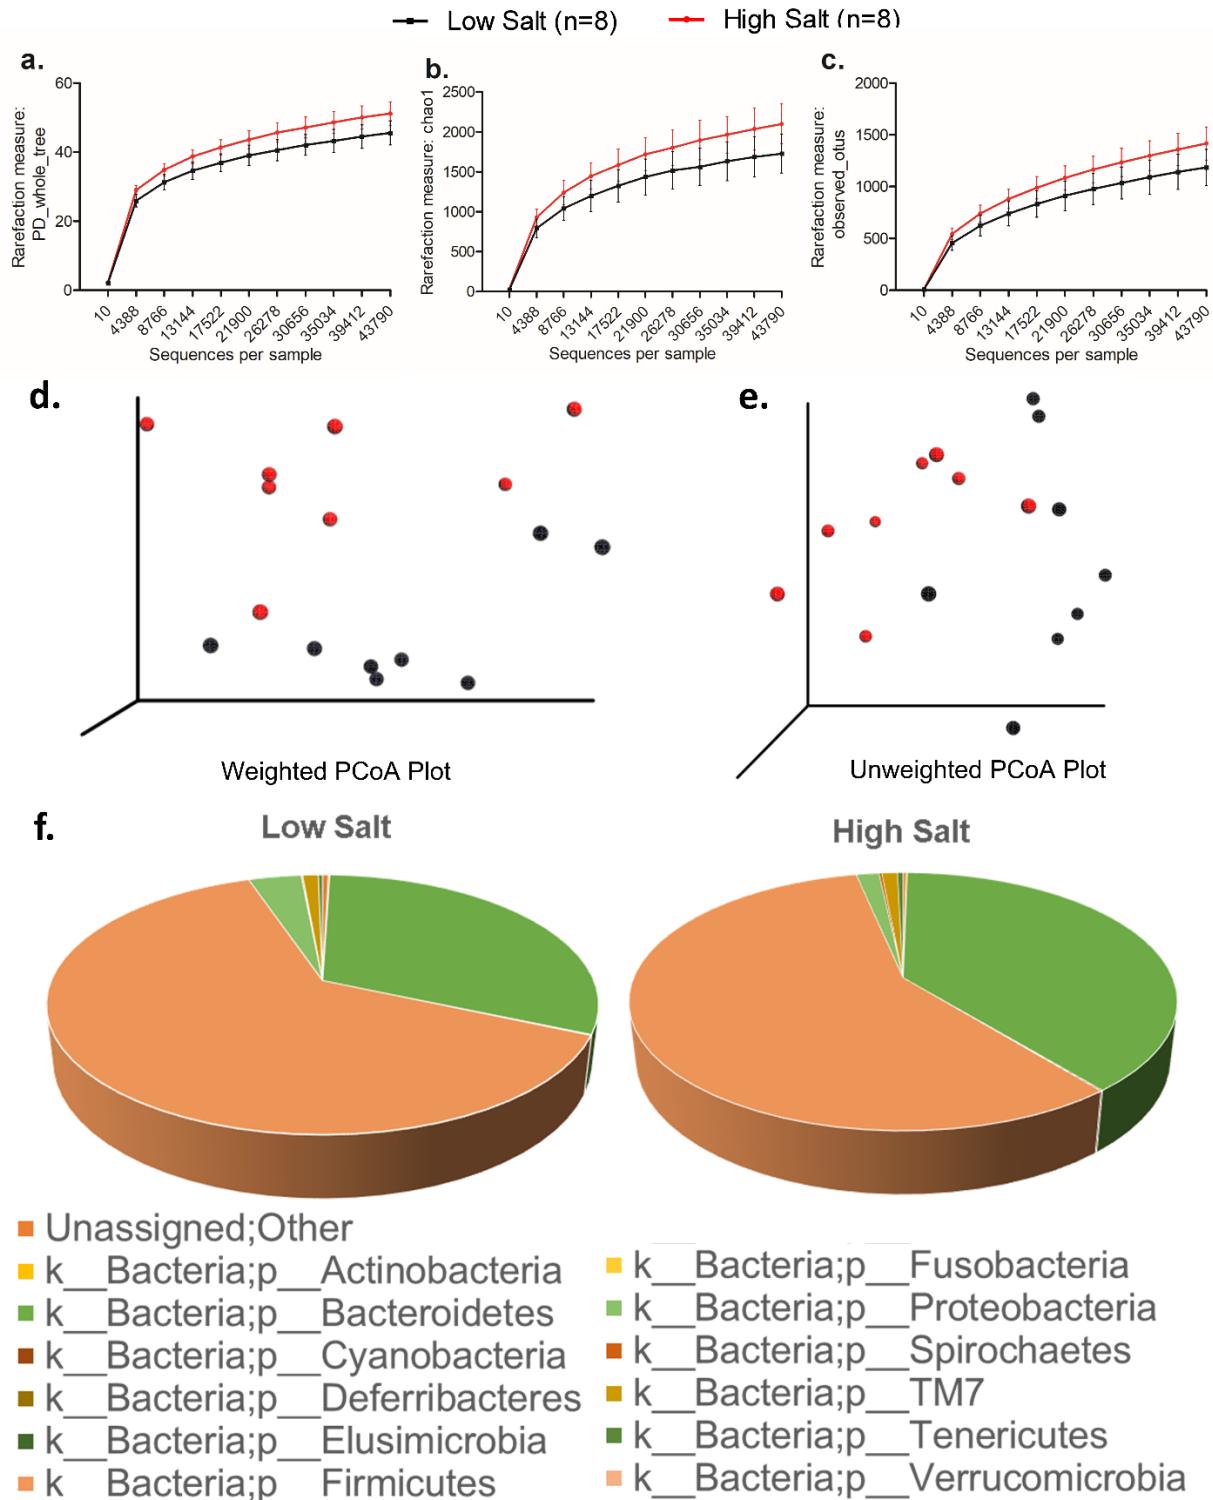

Figure S3. Salt loading results in alterations in gut microbiota. Related to Figure 4

Supplemental Figure 4

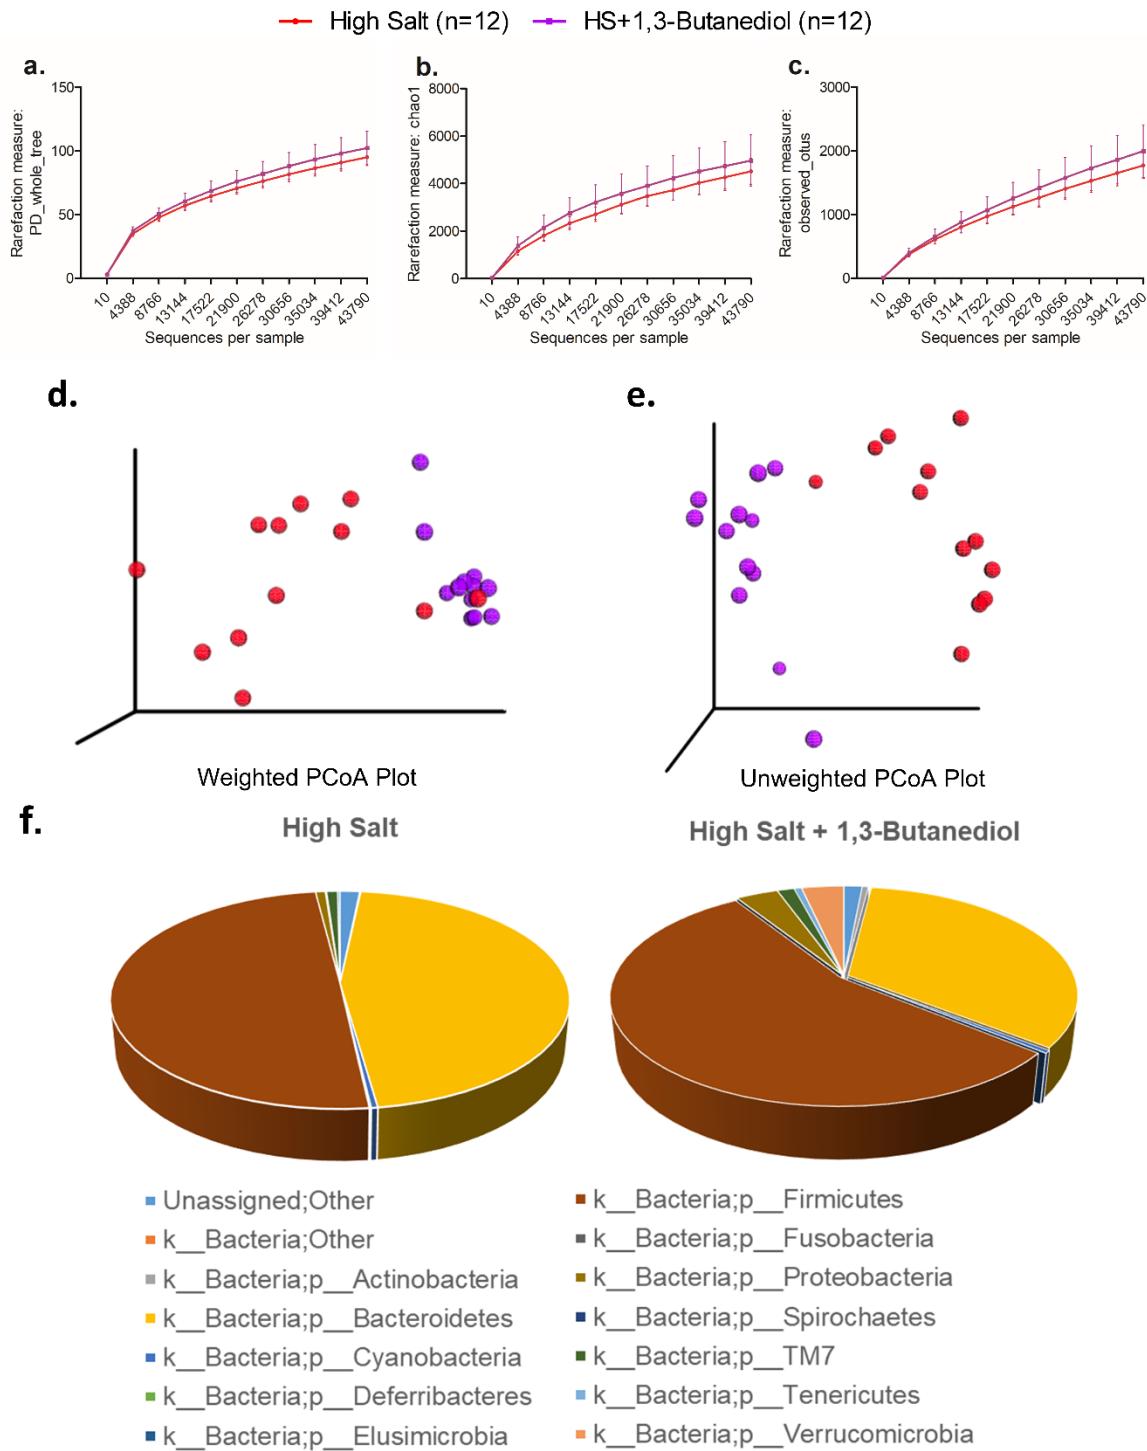

Figure S4. Nutritional intervention with β OHB leads to alterations in gut microbiota.

Related to Figure 5.

Supplemental Figure 5

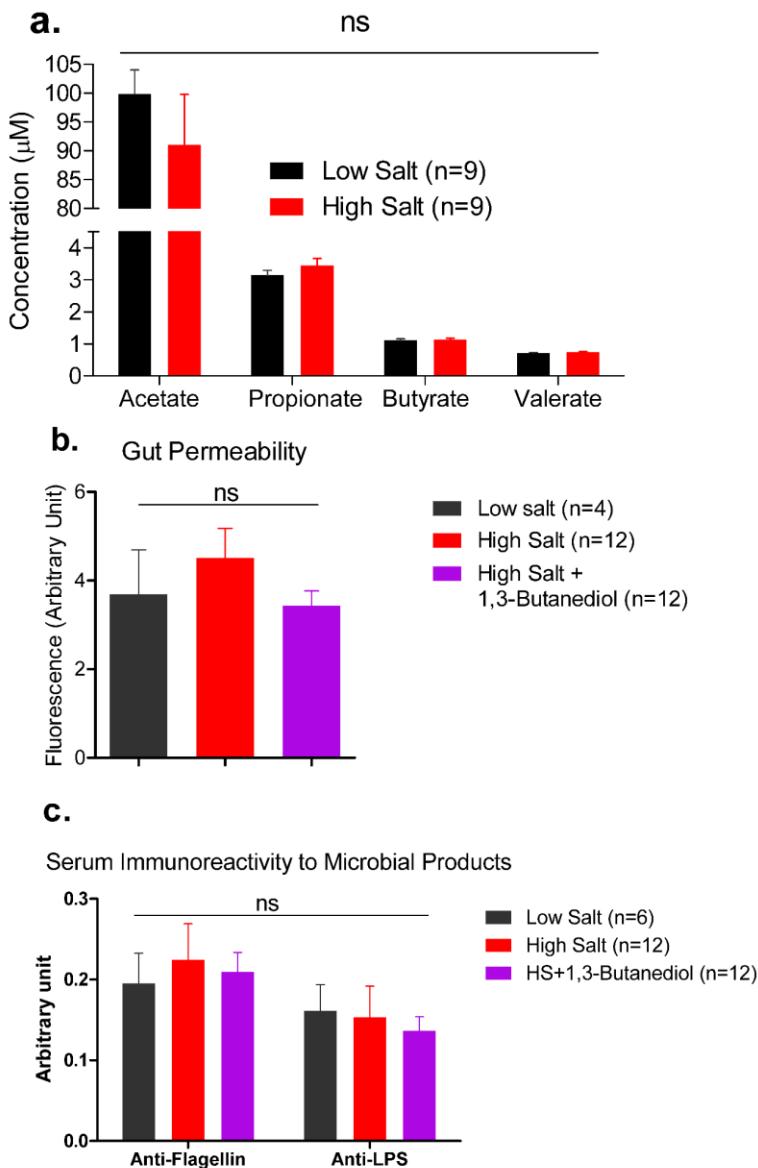

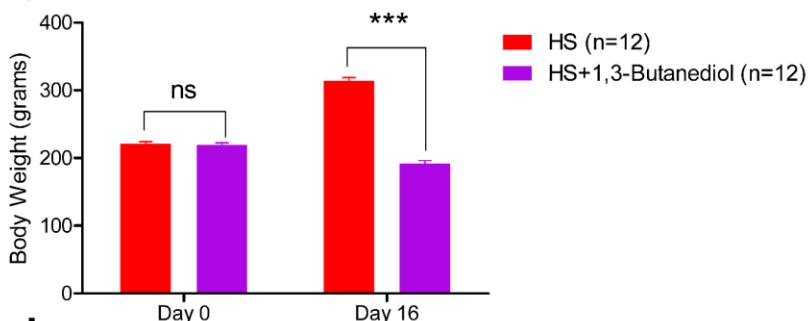

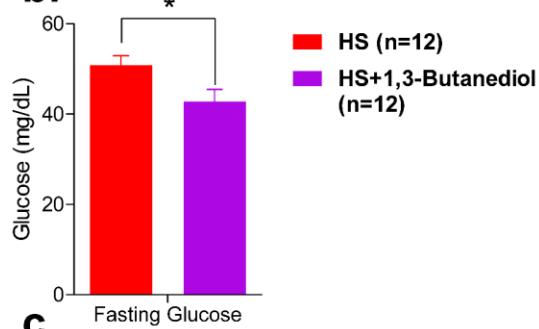

Figure S5. (a) Salt-loading did not alter plasma microbial derived short-chain fatty acids. ns: not significant. **(b) Gut permeability was unchanged by salt loading or intervention of the high salt group with 1,3-butanediol.** ns: not significant. **(c) Serum immunoreactivity to bacterial products were unchanged between the 3 groups.** HS: High Salt; ns: not significant. **Related to Figures 4 and 5.**

Supplemental Figure 6

a.

b.

c.

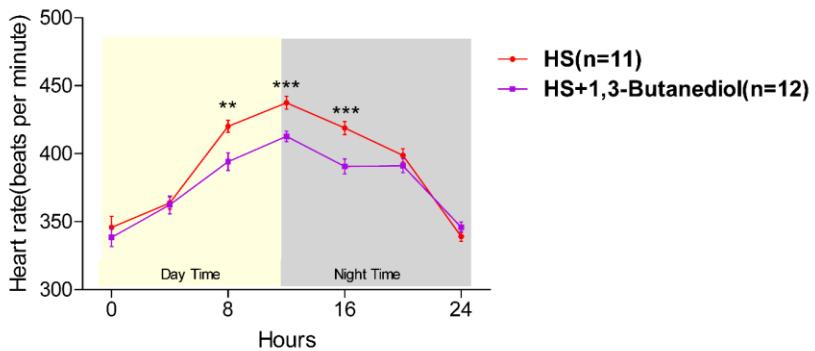

Figure S6. Nutritional intervention with 1,3-Butanediol lowered body weight and fasting glucose. (a) Body weight of rats at day 0 (starting point of high salt and nutritional intervention) and day 16 (post 16 days of administration of β OHB with 1,3-Butanediol). (b) Fasting glucose level of HS and HS+1,3-Butanediol post 3 weeks of 1,3-Butanediol administration. (c) Heart rate of HS and HS+1,3-Butanediol post 3 weeks of 1,3-Butanediol administration. HS: High salt; ns: not significant, * p<0.05, ** p<0.01, * p<0.001. Related to Figures 3 and 6.**

Supplemental Figure 7

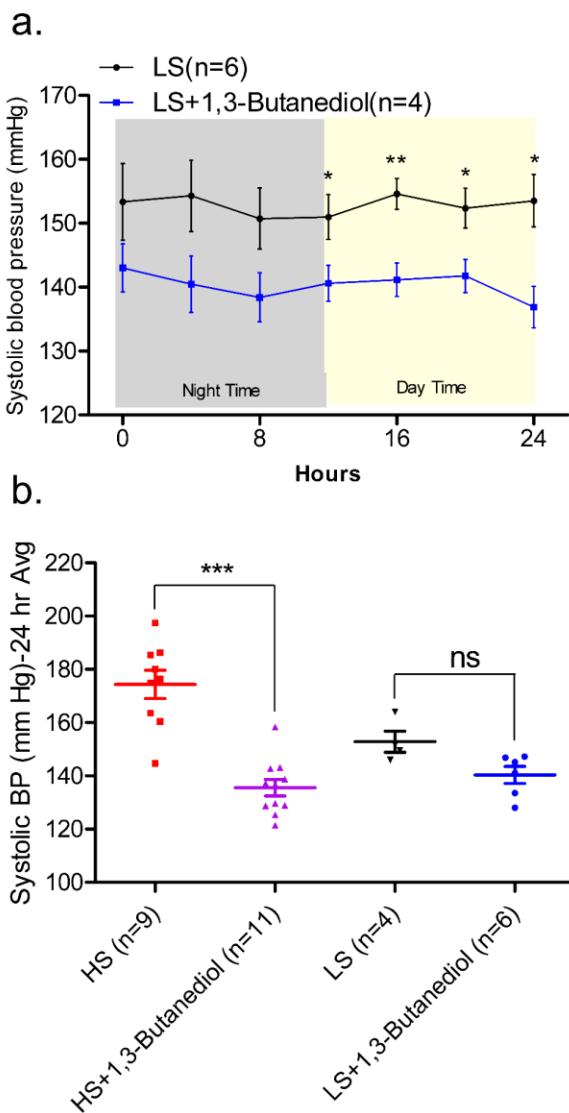

Figure S7. Systolic blood pressure comparison in Salt and 1,3-Butanediol intervention. (a) Systolic blood pressure of LS and LS+1,3-Butanediol post 3 weeks of intervention. (b) 24 hour average systolic blood pressure of HS, HS+1,3-Butanediol, LS, LS+1,3-Butanediol post 3 weeks of 1,3-Butanediol administration. LS: Low salt, HS: High salt; ns: not significant, * p<0.05, ** p<0.01, *** p<0.001. **Related to Figures 1 and 3**

Supplemental Table 1: List of mean of all the significantly different metabolites' mean height peaks generated through GC-TOF-MS based untargeted metabolomics. **Related to Figure 2.**

	Fasting Plasma Metabolites				
BinBase name	Mean Low Salt	Mean High Salt	t-test	Mean(HS)-Mean(LS)	Ranked based on value of Mean(HS)-Mean (LS)
