Supplementary Table S1. Used primer sequences. Primers were designed using the Primer Express Program (Applied Biosystems, Carlsbad, CA). Abbreviations: STAT, signal transducer and activator; IFN α , Interferon alpha; IFN β , Interferon beta; IRF, interferon regulatory factor; OAS, 2'5'-oligoadenylate synthetase; PKR, double stranded RNA-dependent protein kinase; MCP-1, Monocyte Chemoattractant Protein-1; CCN1, Cysteine-rich 61; GAPDH, glyceraldehyde-3-phosphate dehydrogenase.
