Sequence GC Content

APEC infection1 Sequence GC Content_AfterFilter

APEC infection 1 Sequence GC Content_Before Filter

The horizontal axis represents the average GC content, The vertical axis represents reads. The blue line is the theoretical GC content distribution, the red line is the actual GC content distribution, the actual line distribution in the figure with the normal distribution Closely,it indicates that the results are better, can be used for the following analysis

APEC infection2 Sequence GC Content_AfterFilter

APEC infection 2 Sequence GC Content_Before Filter

APEC infection3 Sequence GC Content_AfterFilter APEC infection 3 Sequence GC Content_Before Filter

S3.Fig 2 The horizontal axis represents the average GC content, vertical The blue line is the theoretical GC content distribution, the red line is the actual GC content distribution, the actual line distribution in the figure with the normal distribution

Close, the results are better, can be used for the following analysis
