

**Table S3 - NCOA3 and SLC24A1 disease haplotypes.**

Microsatellite markers are shown with their physical locations (NCBI Build 37.1, hg19). Allele sizes are given in base pairs consistent with Centre d'Etude du Polymorphisme Humain (CEPH) standards, and include CEPH samples 1331-1 and 1331-2 as reference.

a)

Marker	Chromosome and position	NCOA3 Family 1	NCOA3 Family 2	NCOA3 Family 3	CEPH 1331-1	CEPH 1331-2
D20S888	20:45,183,737	159	161	161	155/159	147/163
D20S886	20:45,251,083	151	145	147	145/151	147/147
D20S891	20:45,929,588	216	212	204	212/212	204/210
D20S197	20:46,160,704	191	191	191	191/205	187/191
NCOA3 R485C	20:46,264,406	T	T	T	C	C
D20S178	20:46,551,927	254	248	248	248/250	244/254
D20S176	20:47,313,442	173	167	173	167/185	173/173
D20S866	20:47,363,334	179	183	173	171/173	171/173
D20S887	20:47,673,170	261	245	245	253/255	245/245

b)

Marker	Chromosome and position	SLC24A1 Family 1	SLC24A1 Family 2	SLC24A1 Family 3	CEPH 1331-1	CEPH 1331-2
D15S987	15:63,298,398	176	176	182	176/177	176/176
