

Description of Additional Supplementary Files

File name: Supplementary Data 1

Description: Differential gene expression analysis between Dp1Tyb and WT MEFs. For each gene, the table shows the mean expression, fold change (Dp1Tyb v WT), p-value and p-value adjusted for multiple testing (padj).

File name: Supplementary Data 2

Description: Differential gene expression analysis between Dp1Tyb and WT hippocampus. For each gene, the table shows the mean expression, fold change (Dp1Tyb v WT), p-value and p-value adjusted for multiple testing (padj).
