

**Supplementary Figure 1. Race/ethnicity and gender-specific trends in PC incidence and mortality over time in Florida.** These plots display age-adjusted incidence and mortality rates of pancreatic cancer for the years 2004-2014 (pop std: 2000 US Standard) in Florida for White, Black, and H/L (as reported by the Florida Cancer Data System [FCDS]). Race/ethnicity groups are distinguished using red (White), blue (Black), or gold (H/L) lines.
