Contents:

Figure S1. Photograph of silver(I) complex of metronidazole obtained as a result of one-step synthesis.

Balb/c 3T3

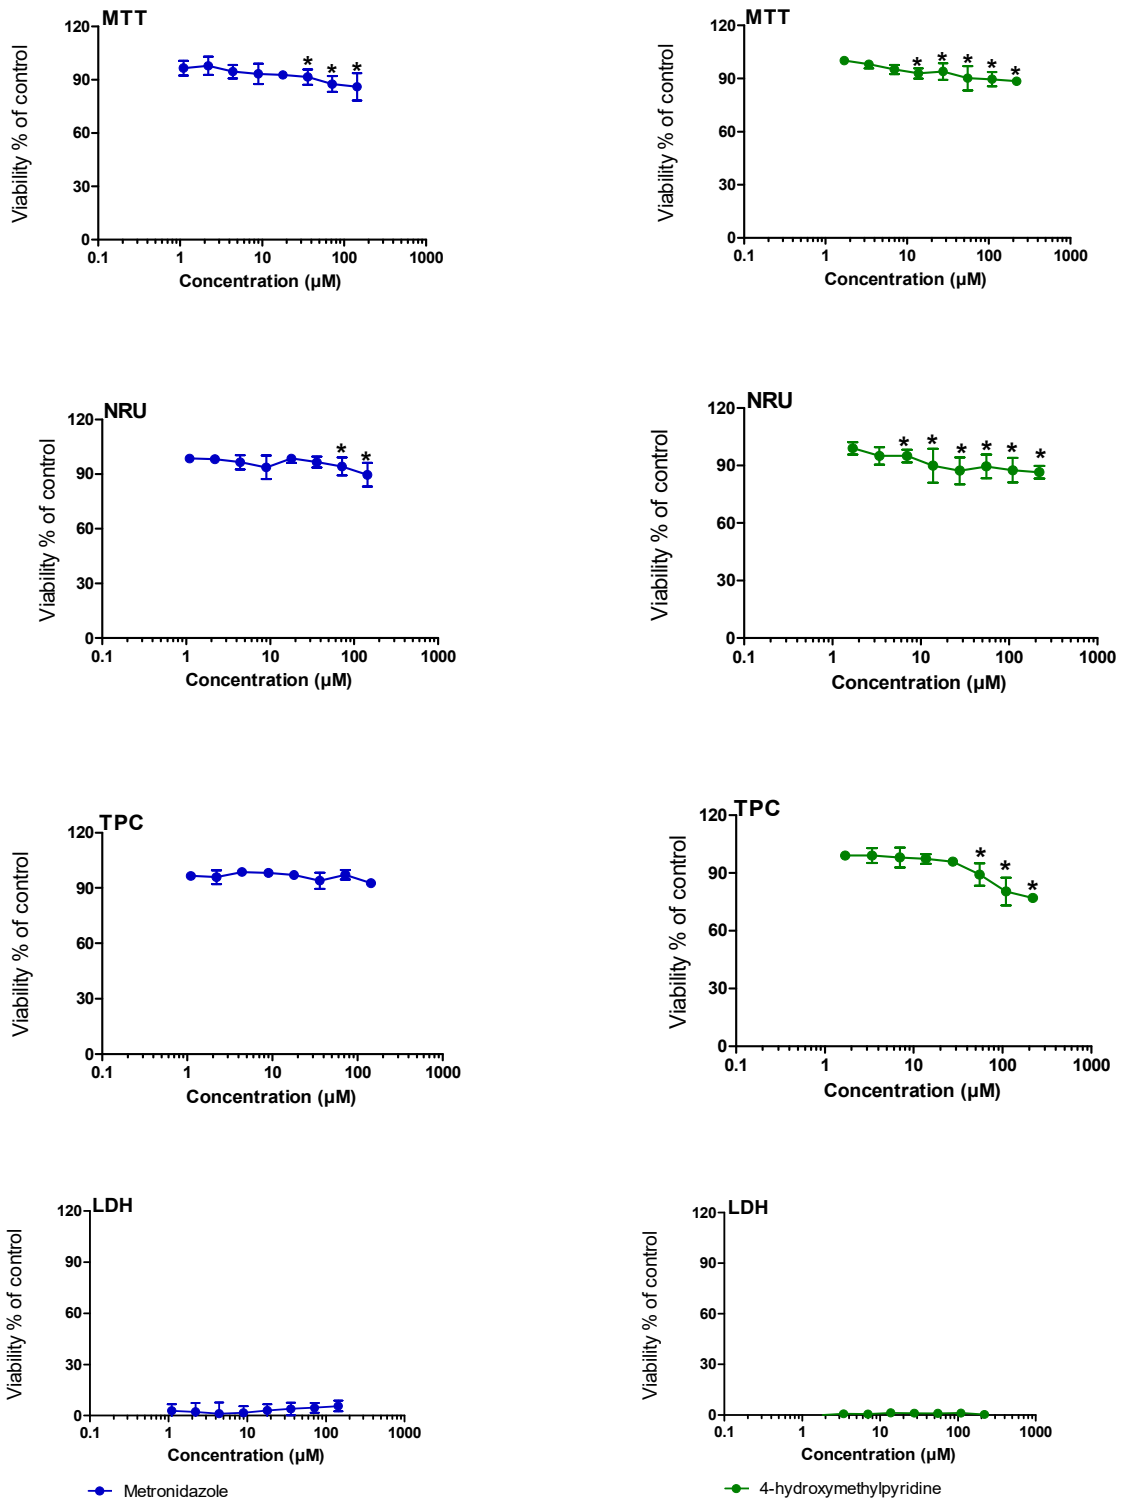

Figure S2. Concentration-dependent response curves for metronidazole and 4-hydroxymethylpyridine assessed by MTT, NRU, TPC, and LDH assays on Balb/c 3T3 cells. The results are expressed as the mean \pm SD of three independent experiments. * $p \leq 0.05$ in comparison with negative control (0.1% DMSO).

HepG2

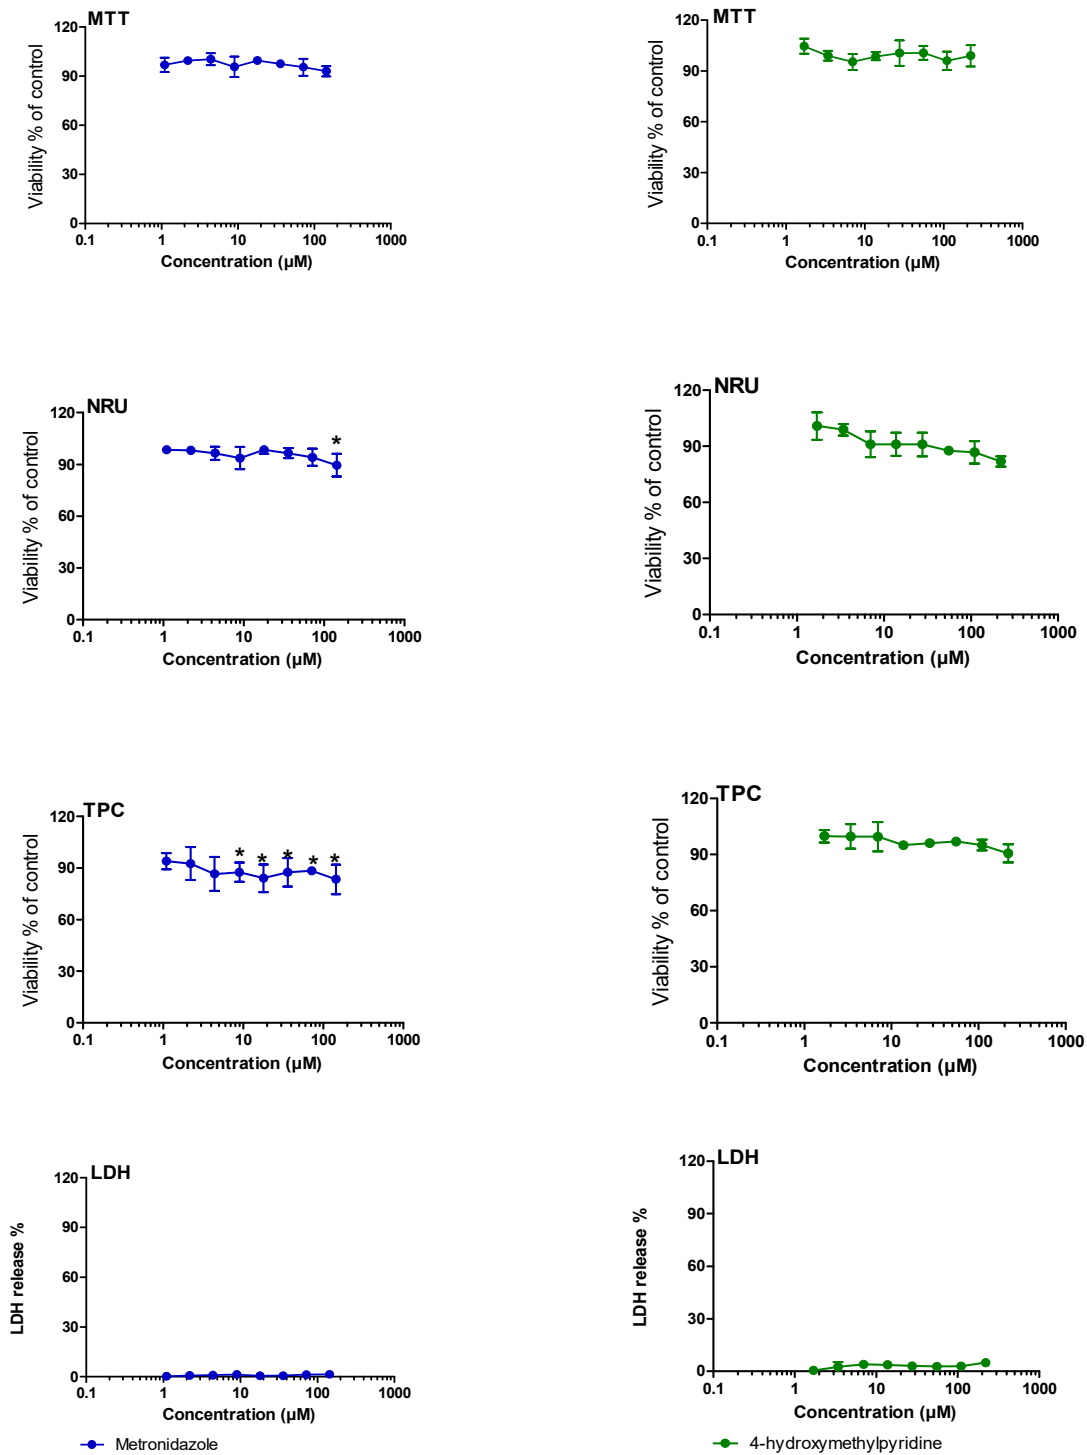

Figure S3. Concentration-dependent response curves for metronidazole and 4-hydroxymethylpyridine assessed by MTT, NRU, TPC, and LDH assays on HepG2 cells. The results are expressed as the mean \pm SD of three independent experiments. * $p \leq 0.05$ in comparison with negative control (0.1% DMSO).
