Controls in Analysis		Demographic Info		Published Study						
Yes	22 (84.6)	Yes	23 (88.5)	Yes	21 (80.8)					
No	4 (15.4)	No	3 (11.5)	No	5 (19.2)					

Legend: The individual quality score items are summed to generate a total score for each study. Total scores range from 0 to 9. Articles were given a score of 0 ("No") or 1 ("Yes") for each criterion and summed to give a total score out of 9. The classification system used identified studies of low (≤ 2), moderate (3-5), or high quality (≥ 6). The average study quality score was 6.5. Three studies (11.5%)^{4,5,10} fell in the low quality range, 1 study in the moderate (3.8%), and the remaining 22 studies (84.6%) fell in the high quality range. The three studies deemed to have low methodological quality were removed from analyses. Y = Yes; N = No

For additional information on scoring criteria, refer to eTable 1 in Madigan et al., 2018.²⁷
