	Total	89.8 (88)	91.4 (90)	0.774	86.2 (81)	89.0 (84)	0.627	0.850

\*p-value: McNemar tests (changes in each group).

\*\*p-value: Generalized linear models (differences in the changes from baseline to the end of the intervention in the intervention and control groups).

The main analysis was based on the intention-to-treat population.

<sup>a</sup> Sugary drinks takes into account three categories: commercial juice, soda and coke.
