Search ((((((fever OR fevers OR feverish OR febril* OR febricity OR pyrexia*)) AND ((((((sepsis OR septicemia OR septicemia)) OR (urinary tract infections OR UTI OR urinary tract infection*)) OR (meningitis, bacterial OR bacteria* OR listeria* OR escherichia OR haemophilus OR hemophilus OR meningococ* OR pneumococ*)) OR (bacteremia OR bacteraemia)) OR (SBI OR SBIs OR serious bacterial infection* OR severe bacterial infection*)))) AND infant[MeSH])) OR (((infant OR infants OR newborn* OR neonat*)) AND (((fever OR fevers OR feverish OR febril* OR febricity OR pyrexia*)) AND ((((((sepsis OR septicemia OR septicemia)) OR (urinary tract infections OR UTI OR urinary tract infection*)) OR (meningitis, bacterial OR bacteria* OR listeria* OR escherichia OR haemophilus OR hemophilus OR meningococ* OR pneumococ*)) OR (bacteremia OR bacteraemia)) OR (SBI OR SBIs OR serious bacterial infection* OR severe bacterial infection*))))))

eTable. Newcastle-Ottawa Quality Assessment Scale Scores

Study	Number of Stars in Each Category			Total
	<i>Selection (max = 4)</i>	<i>Comparability (max = 2)^a</i>	<i>Outcome (max = 3)</i>	
Ashkenazi-Hoffnung	4	2	3	9
Bachur and Harper, 2001	3	2	3	8
Baker and Bell, 1999	4	1 ^b	3	8
Bonadio et al, 1993	4	2	3	9
Bonsu et al, 2012	3	1 ^b	3	7
Caviness et al, 2008	2	1 ^b	3	6
Chiu et al, 1994	4	2	3	9
Chiu et al, 1997	4	2	3	9
Ferrera et al, 1997	3	2	3	8
Garcia et al, 2012	3	2	3	8
Herr et al, 2001	3	2	3	8
Zarkesh et al, 2011	3	2	3	8

^a One point given for an attempt to control for risk above the general febrile infant population (e.g. excluding infants with chronic illness) and one point given for an attempt to control for false positive/false negative culture results (e.g. excluding contaminants)

^b Accounted for contaminants, but not for risk status (e.g. prematurity, chronic disease, etc...)
