

Supplementary Figure S1.

**Supplemental Figure S1.** Time courses of average spike amplitudes every 10 min from 80 min after PG injection. (a) PG + 1% DMSO ( $n = 7$ ), (b) PG + 0.3 mM icilin ( $n = 7$ ), (c) PG + 1.0 mM icilin ( $n = 7$ ) and (d) PG + 3.0 mM icilin ( $n = 7$ ). The results are shown as mean  $\pm$  SEM;  $**p < 0.001$  vs. 10 min average spike amplitude for the pre-injection period from 80 to 90 min using the Bonferroni test.
