

Supplementary Figure S2.

Supplementary Figure S2. (a) Photomicrographs of a coronal section from a rat in the PG + 3.0 mM icilin group acquired after the ECoG recording. The arrowhead shows the cannula injection location. Hematoxylin and eosin staining, scale bar = 1000 µm.

(b) Enlarged photomicrograph around the cannula injection location. Hematoxylin and eosin staining, scale bar = 100 µm.
