

Events and Annotations

The Events menu allows searching and visualising events and annotations performed in the different objects (e.g. plants, sensors, experiments) declared in the information system.

Different filters can be applied based on **Dates**, **Type**, **Description** of events or the **Concern** or **Alias** object (Fig. 1). As an example, searching for plant 795 (having the URI `m3p:/arch/2017/c17000795`) in the **Concern** box, results in seven different events describing:

- `oevv:Sowing` => sowing pf the plant
- `oevv:Thinning` => installation of plant tutors
- `oevv:Fertilization` => fertilizer application
- `oeev:Stacking` => installation of plant tutors
- `oevv:MoveTo` => displacement event
- `oevv:StuckPlant` => an incident occurred during imaging
- `oevv:Harvesting` => harvesting of the plant

Annotations

Annotations are mainly guided by the **OEev ontology** and the **Web Annotation Data Model** that allows annotating any object declared in the system and assigning motivation and purpose attributes to annotations (e.g. oa:describing, oa:identifying, oa:linking, oa: replying, etc.).

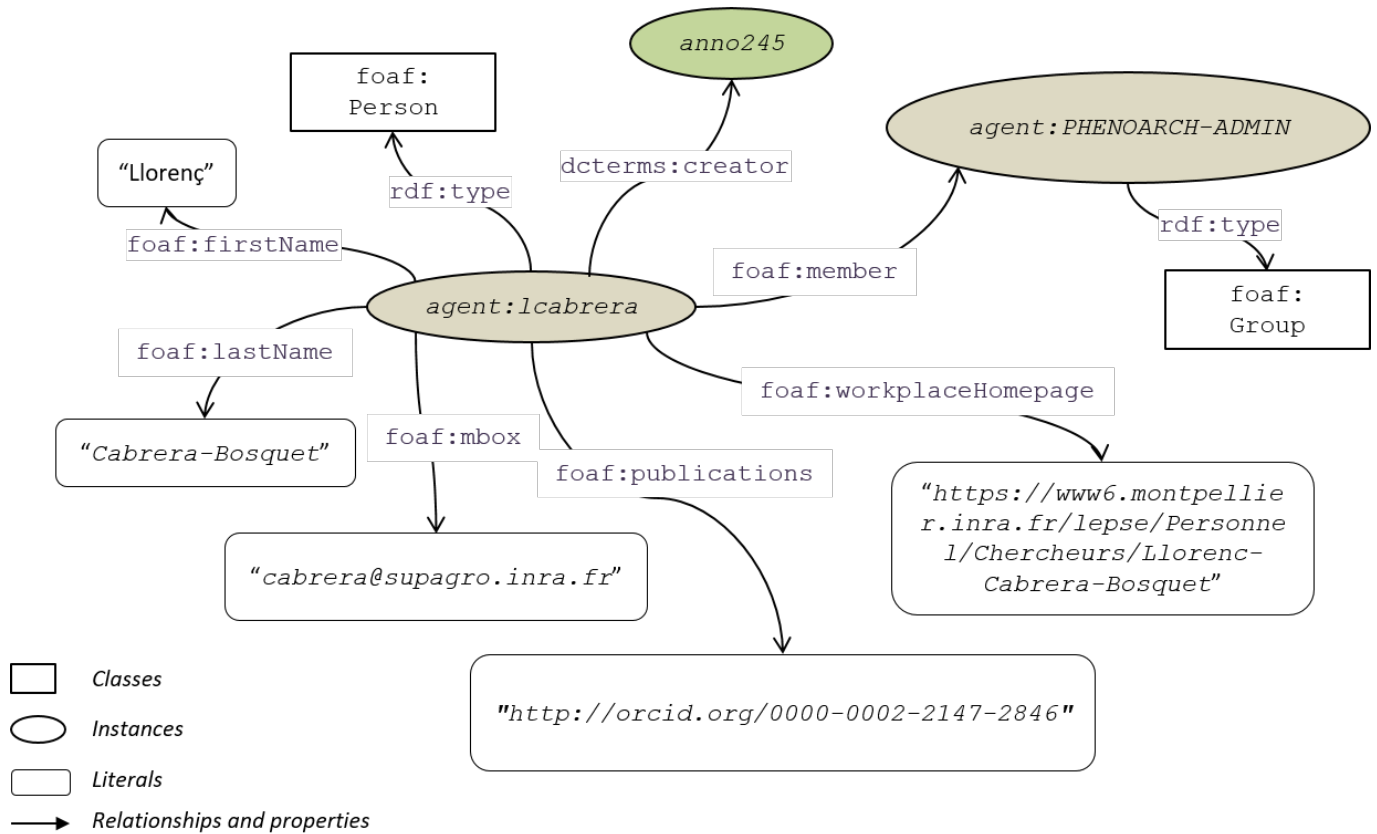

```
'http://www.w3.org/ns/oa#describing' => 'oa:describing',
'http://www.w3.org/ns/oa#identifying' => 'oa:identifying',
'http://www.w3.org/ns/oa#moderating' => 'oa:moderating',
'http://www.w3.org/ns/oa#assessing' => 'oa:assessing',
'http://www.w3.org/ns/oa#bookmarking' => 'oa:bookmarking',
'http://www.w3.org/ns/oa#classifying' => 'oa:classifying',
'http://www.w3.org/ns/oa#commenting' => 'oa:commenting',
'http://www.w3.org/ns/oa#editing' => 'oa:editing',
'http://www.w3.org/ns/oa#highlighting' => 'oa:highlighting',
'http://www.w3.org/ns/oa#linking' => 'oa:linking',
'http://www.w3.org/ns/oa#questioning' => 'oa:questioning',
'http://www.w3.org/ns/oa#replying' => 'oa:replying',
'http://www.w3.org/ns/oa#tagging' => 'oa:tagging',
```

Annotation

Dublin Core and **foaf** specifications such as `dcterms:created`, `dcterms:creator`, `foaf:Agent` are also used. For instance, the agent `agent:Lcabrera`, is a `Person` member of the group `PHENOARCH-ADMIN` that has a number of attributes such as `firstName`, `lastName`, `mbox`, etc. The Agent `agent:Lcabrera` is the author (`dcterms:creator`) of the annotation#245 (Fig. 6).

Agent

The different prefixes stand for:

- oeev: <http://www.phenome-fppn.fr/vocabulary/2018/oeev#>
- oa: <http://www.w3.org/ns/oa#>
- foaf: <http://xmlns.com/foaf/spec/>
- rdf: <http://www.w3.org/1999/02/22-rdf-syntax-ns#>
- time: <http://www.w3.org/2006/time#>
- dcterms: <http://purl.org/dc/terms/>
- agent: <http://www.phenome-fppn.fr/id/agent/>

Annotations and events can be added into any object (e.g. plant, device, experiment, event) by clicking on the **add annotation** and **add event** buttons present in the different menus:

Lodging of plot

The following semantic graph represents how **OEEv** ontology is used for representing a lodging event associated to **plot97** (Fig. 7).

In the example presented here, the **event54** that concerns **plot97** is of type **Lodging** and occurred the **"2017-06-29"**. **event356** is associated to the **ann4807** which is of type **Annotation** and is motivated by describing (**oa:describing**). This annotation, has a creator (**Agent1**), a date of annotation ("**2017-08-10**") and a body value describing the event ("**Plots lodged after the storm**").

Lodging of a plot

- Instances are depicted as coloured ellipses.
- Classes are depicted as white rectangles.
- Literals are depicted as white lozenges.
- Relationships and properties are depicted as black lines.

For better legibility objects are labelled with shortened alias names rather than using full URIs:

- **plot97**: <http://www.phenome-fppn.fr/diaphen/2017/o17000097> **Agent1**: <http://www.phenome-fppn.fr/id/agent/rchapuis>
- **event356**: <http://www.phenome-fppn.fr/id/event/cafa1c09-2cbf-409f-82f9-9f20496e3eb9>
- **anno480**: <http://www.phenome-fppn.fr/id/annotation/469bca50-10f9-4deb-9b3a-6ae7476306cb>

Note that not all objects and events associated to **plot97** are represented in this graph. Fulls details can be found in the PHIS user interface by searching for plot 97 in the different menus (e.g. **Events**, **Scientific objects**).

The event can be displayed in the web user interface by filtering by lodging and plot97 in the Events menu. Further information can be displayed by clicking on the [Browse Triplestore](#) button:

Plant blocked in imaging cabin

The following semantic graph represents how **OEev** ontology is used for representing an incident during imaging acquisition associated to **plant795** (Fig. 10).

In the example presented here, the **event849** that concerns **plant795** is of type **PlantStuck** and occurred the **"2017-05-15"**. **event849** is associated to the **anno86** which is of type **Annotation** and is motivated by describing (**oa:describing**). This annotation, has a creator (**Agent2**), a date of annotation ("**2017-05-26**") and a body value describing the event ("**Fallen plant during imaging**").

Plant stuck in cabin

- Instances are depicted as coloured ellipses.
- Classes are depicted as white rectangles.
- Literals are depicted as white lozenges.
- Relationships and properties are depicted as black lines.

For better legibility objects are labelled with shortened alias names rather than using full URIs:

- **plant795**: <http://www.phenome-fppn.fr/m3p/arch/2017/c17000795> **Agents**:
- <http://www.phenome-fppn.fr/id/agent/lcabrera> **event849**: <http://www.phenome-fppn.fr/id/event/bcbb7240-34bc-4bc3-8ff3-31911e4b6aa7> **anno86**: <http://www.phenome-fppn.fr/id/annotation:4aac3076-b542-4f6e-92e1-9d350dd3eec5>

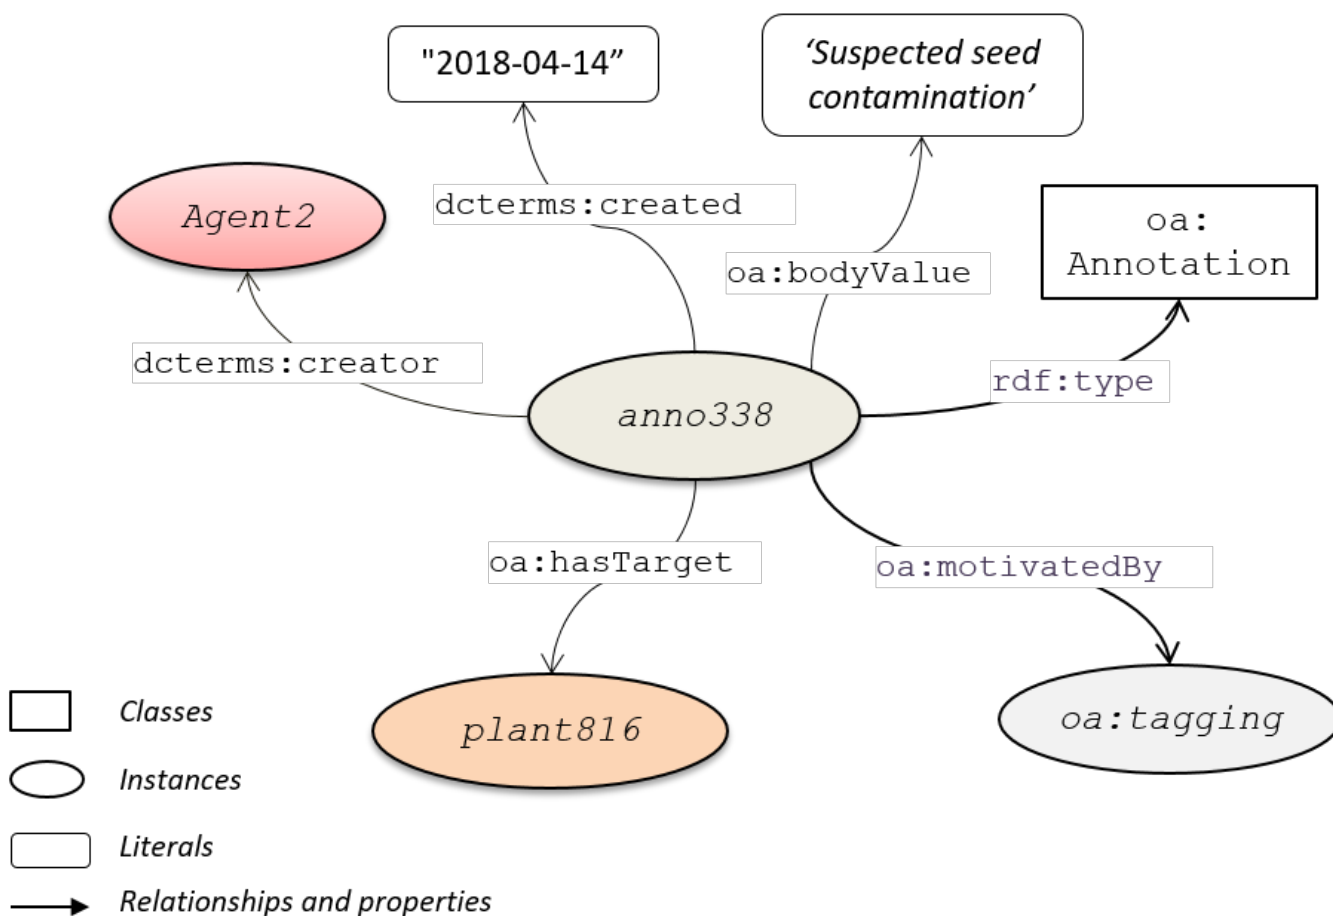

Note that not all objects and events associated to **plant795** are represented in this graph. Full details can be found in the PHIS user interface by searching for plant 97 in the different menus (e.g. **Events**, **Scientific objects**).

Suspected seed contamination

The following semantic graph represents how **OEEv** ontology is used for annotating an anomaly detected during data processing (i.e. suspected seed contamination) (Fig. 11).

The **anno338** which is of type **Annotation** and is motivated by tagging (**oa:tagging**) has as target **plant816**. The **anno338** has a creator (**Agent2**), a date of annotation ("**2018-05-17 11:02:39**") and a body value describing the event ("**Suspected seed contamination**").

Expert annotation during data processing

- Instances are depicted as coloured ellipses.
- Classes are depicted as white rectangles.
- Literals are depicted as white lozenges.
- Relationships and properties are depicted as black lines.

For better legibility objects are labelled with shortened alias names rather than using full URIs:

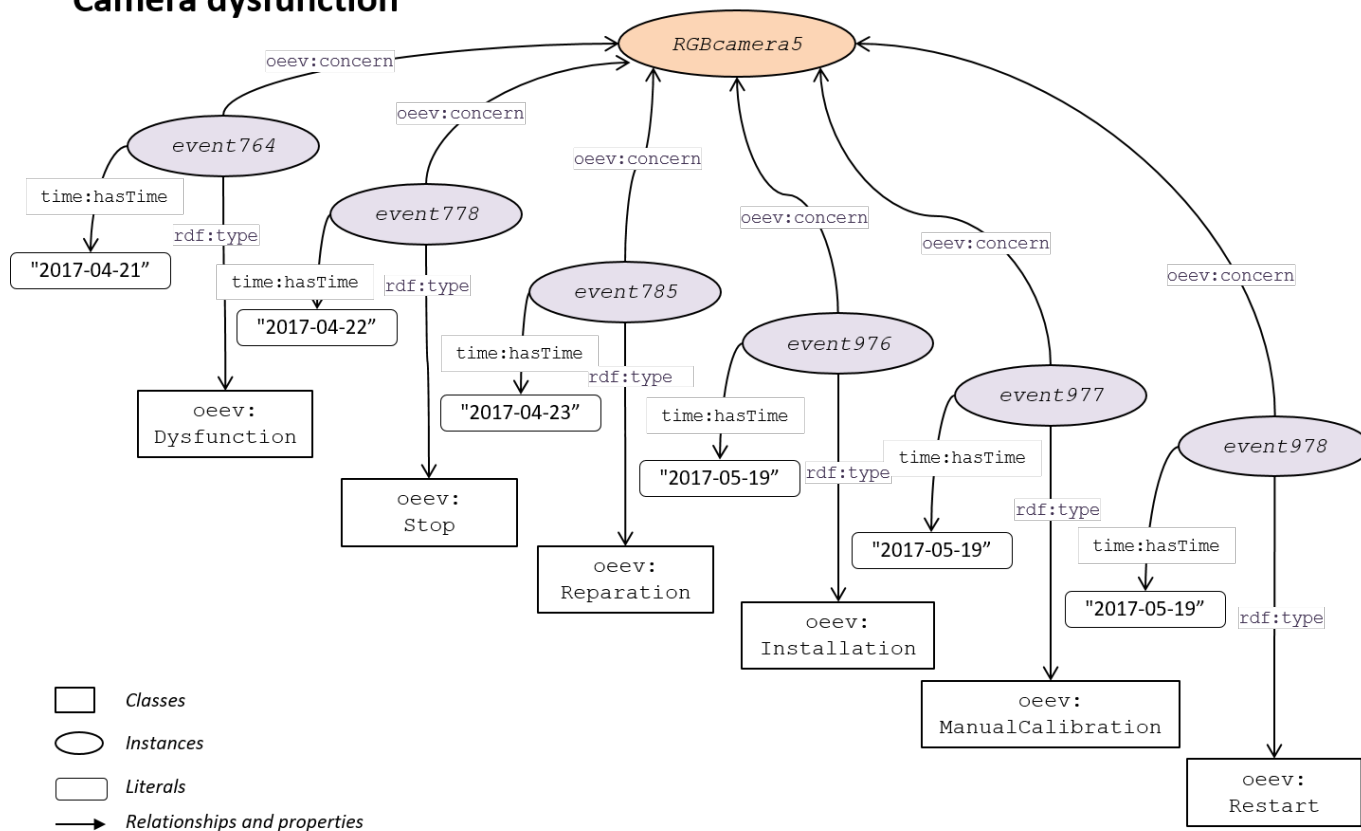

- **plant816**: <http://www.phenome-fppn.fr/m3p/arch/2017/c17000816>
- **Agent2**: <http://www.phenome-fppn.fr/id/agent/lcabrera>
- **anno338**: <http://www.phenome-fppn.fr/id/annotation/5b0bd064452b1>

Note that not all objects and events associated to **plant816** are represented in this graph. Fulls details can be found in the PHIS user interface by searching for plant 97 in the different menus (e.g. **Events**, **Scientific objects**).

Camera Dysfunction

In this example the target is a RGB camera that suffered a dysfunction (Fig. 12):

Camera dysfunction

As represented in the semantic graph the **RGBcamera5** suffered as **Dysfunction** the "2017-04-21". The "2017-04-22", image acquisition was stopped in cabin 5 as represented with the event **Stop**. The "2017-04-23" the camera was sent to the factory for **Reparation**. The "2017-05-19", the repaired camera was reinstalled and calibrated before being put in service again, as represented by the **Installation**, **ManualCalibration** and **Restart** events.

For better legibility objects are labelled with shortened alias names rather than using full URIs:

- **RGBcamera5**: <http://www.phenome-fppn.fr/m3p/arch/2018/ac180011> **event764**:
- <http://www.phenome-fppn.fr/id/event/dda84a5e-8783-4f60-8d80-d5a3ccb36b25> **event778**:
- <http://www.phenome-fppn.fr/id/event/8be63f29-b3ba-4d0a-b40b-775d6119b167>
- **event785**: <http://www.phenome-fppn.fr/id/event/39a5a56a-bec8-4a35-a4dc-35d9c13b480f>
- **event976**: <http://www.phenome-fppn.fr/id/event/2ed84816-516f-4621-b7b9-face4ac7de4>
- **event977**: <http://www.phenome-fppn.fr/id/event/2ed6d628-c076-42d1-b8ba-014eaade4701>
- **event978**: <http://www.phenome-fppn.fr/id/event/05dc3267-9cce-4bce-8175-a7b2e04d663f>

Only event types and dates are represented. Full details can be consulted online in the Events or Device menu by searching for *camera* or <http://www.phenome-fppn.fr/m3p/arch/2018/ac180011> (Fig. 13).
