

Supplementary information

Palladium/palladium oxide coated electrospun fibers for wearable sweat pH-sensors

Victor C. Diculescu, Mihaela Beregoi, Alexandru Evangelidis, Raluca F. Negrea, Nicoleta G. Apostol, Ionut Enculescu

Photograph obtained during the mechanical stress test through bending of the pH-sensor and OCP values recorded before and after some bending cycles.

Figure S1. (a) Photograph of the sensor subjected to mechanical stress.

(b) OCP values of the pH-sensor recorded in artificial sweat at pH = 7.4 before and after 10 or 100 bending cycles.
