

1) Venn diagrams of genes differentially expressed between the two grapevine cultivars at 3 and 6 days after HSt and FDSSt attacks. Venn diagrams illustrating the relationship between the DEGs detected at 3 and 6 days post infestation in HSt (A on the top) and FDSSt (B on the top) and the overlap between up-regulated and down-regulated DEGs (A and B on the bottom).

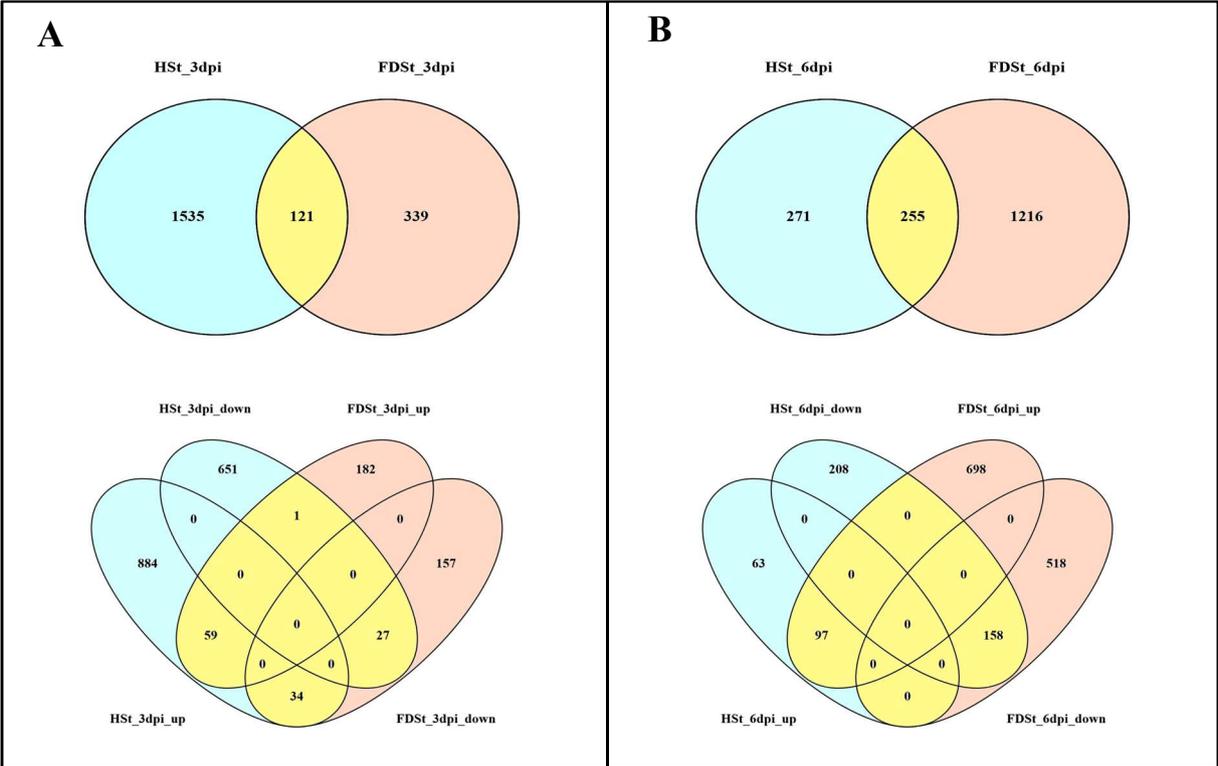

2) Venn diagrams of genes genes differentially expressed between the two grapevine cultivars after HSt and FDSt attacks at two time points. Venn diagrams illustrating the relationship between the DEGs modulated after HSt and FDSt attacks at 3 (A on the top) and 6 days post infestation (B on the top) and the overlap between up-regulated and down-regulated DEGs (A and B on the bottom).

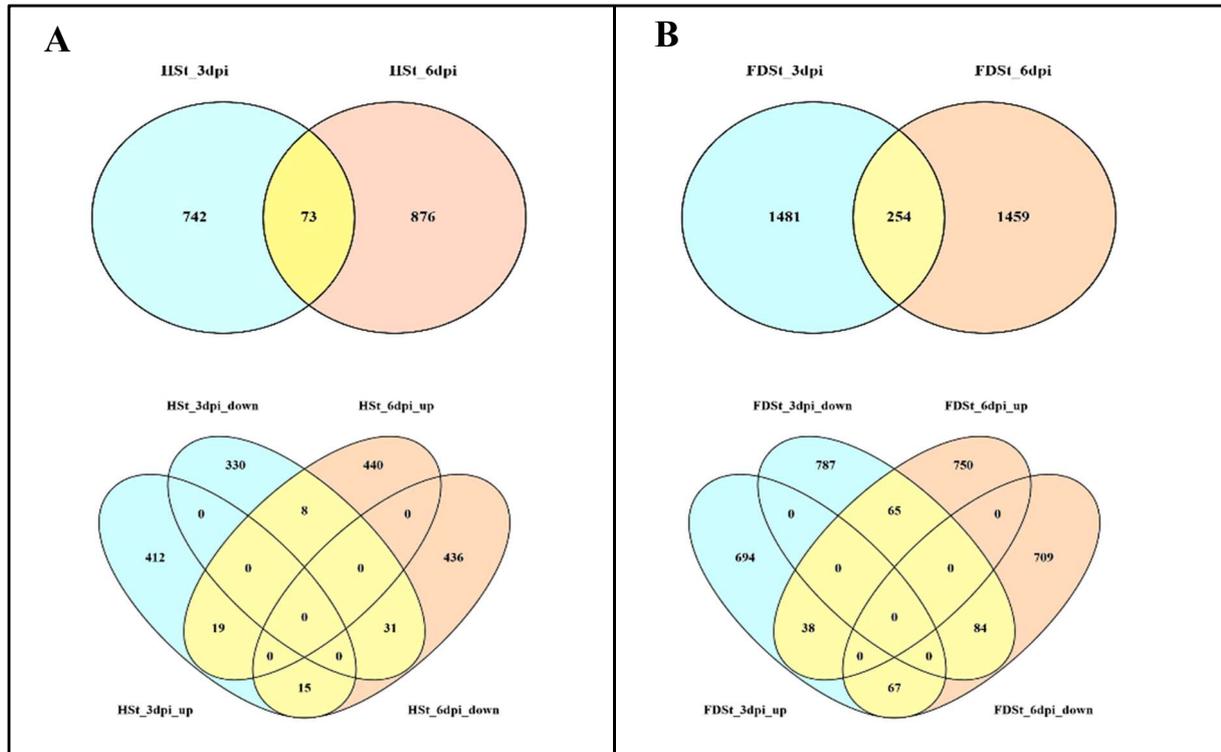

**3) Venn diagrams of genes modulated at 3 and 6 days after HSt and FDSt attacks in Chardonnay.** Venn diagrams illustrating the relationship between the DEGs detected at 3 and 6 days post infestation in HSt (**A on the top**) and FDSt (**B on the top**) and the overlap between up-regulated and down-regulated DEGs (**A and B on the bottom**).

**Venn diagrams of genes modulated after HSt and FdSt attacks in Chardonnay at two time points.** Venn diagrams illustrating the relationship between the DEGs modulated after HSt and FdSt attacks at 3 (**A on the top**) and 6 days post infestation (**B on the top**) and the overlap between up-regulated and down-regulated DEGs (**A and B on the bottom**).

**4) Venn diagrams of genes modulated at 3 and 6 days after HSt and FDSSt attacks in *Tocai friulano*.** Venn diagrams illustrating the relationship between the DEGs detected at 3 and 6 days post infestation in HSt (**A on the top**) and FDSSt (**B on the top**) and the overlap between up-regulated and down-regulated DEGs (**A and B on the bottom**).

**5) Venn diagrams of genes modulated after HSt and FDSSt attacks in Tocai friulano at two time points.** Venn diagrams illustrating the relationship between the DEGs modulated after HSt and FDSSt attacks at 3 (A on the top) and 6 days post infestation (B on the top) and the overlap between up-regulated and down-regulated DEGs (A and B on the bottom).
