Rank (no ties) the corrections in or physically comfortable (consider, w (1 = most comfortable)							
Eye-tracked/head-tracke My own correction	d de	pth	1 1	2 2			
Comments?							
Rank (no ties) the corrections in order of which made it easiest to switch between focusing clearly at multiple distances. (1 = easiest)							
Eye-tracked depth	1	2	3				
Head-tracked depth	1	2	3				
My own correction	1	2	3				
Comments?							
(continued on back)							

Rank (no ties) the type of correction which is the most convenient
overall, remembering, for example, that progressives and
monovision have initial adjustment periods, and that Autofocal
glasses would need regular recharging. (1 = most convenient)

	Eye-tracked depth	1	2	3		
	Head-tracked depth	1	2	3		
	My own correction	1	2	3
