

A.

B.

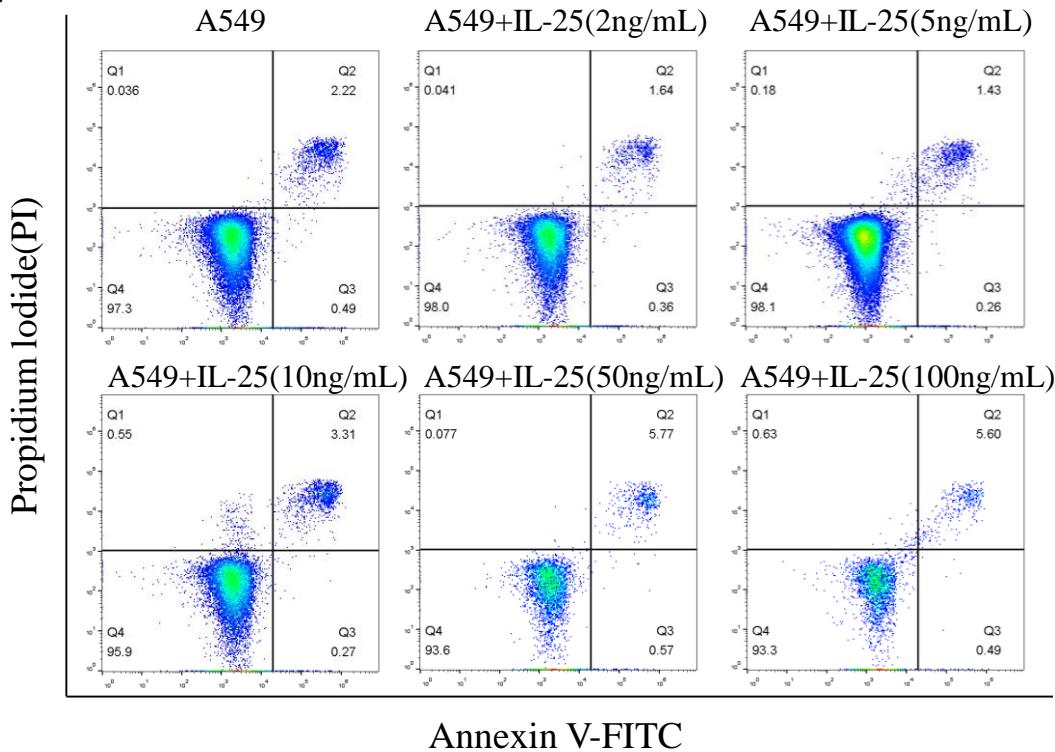

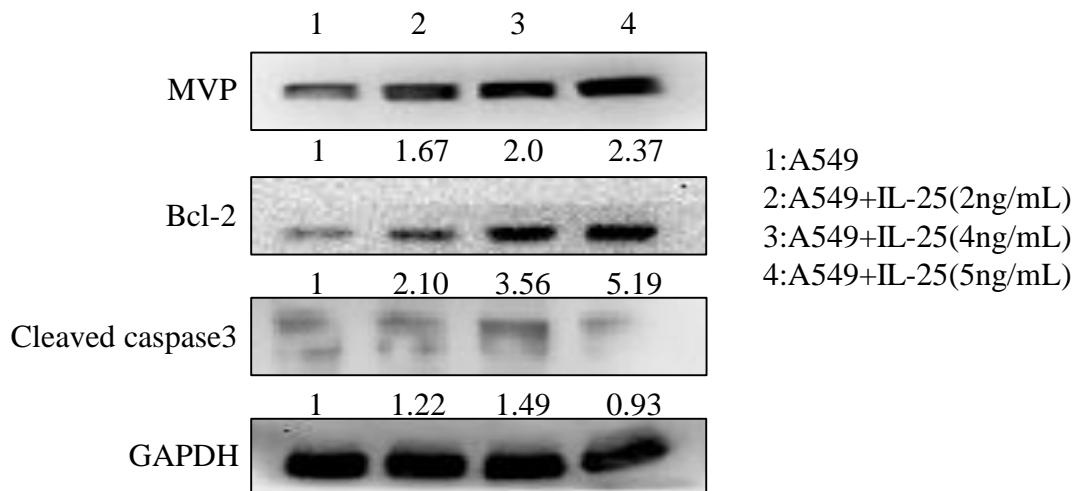

Figure S1. (A) the expression of E-cadherin and mmp9 in A549/CDDP cells, parental A549 cells served as control. (B) Flowcytometry analysis the apoptosis ratio in different concentration of exogenous IL-25 treated A549 cells.

Supplementary Figure 2

A.

B.

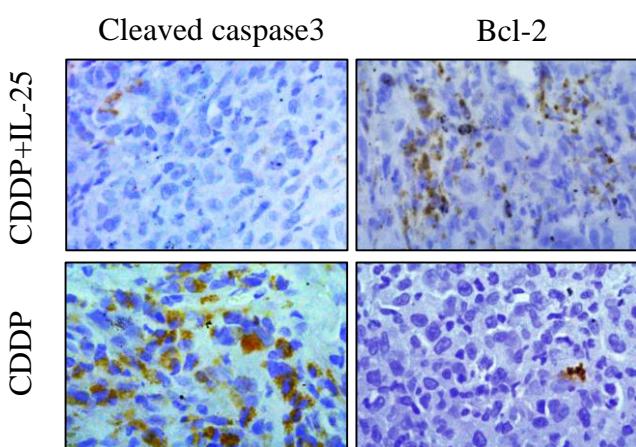

Figure S2. (A) The expression of Bcl-2 and cleaved caspase 3 in IL-25 treated A549 cells. (B) Representative microphotographs showing immunohistochemical staining analysis the expression of Bcl-2 and cleaved caspase 3 in tumor tissues (magnification, $\times 100$).
