≥25	234	110 (47)	1.03 (0.85, 1.25)	38 (16)	1.17 (0.78, 1.76)

Abbreviations: BSA, body surface area; BMI, body mass index; CI, confidence interval; FFM, fat-free mass; FM, fat mass; HRA, high-risk adenoma; RR, risk ratio.

Note: Two men were missing height, and thus excluded from the calculations of BMI, BSA, FFM, and FM.

^a RR adjusted for age, clinical center, aspirin assignment, and folic acid assignment. Endpoints were contrasted to those without colorectal neoplasia.

^b Calculated using the method of DuBois and DuBois (5).

^c Calculated using the method of Janmahasatian et al. (6).

^d Weight minus FFM.
