

Supplementary Material

Table S1

Supplementary table 1. Effects of TNF α on endothelial cell syndecan-3 RNA gene expression.

Endothelial cells were treated with and without TNF α [100 ng/ml] for up to 24 hours and RNA subjected to quantitative PCR. An ANOVA with Dunnet post-test did not give any significant differences between time points.

Time (hours)	Mean $2^{-\Delta\Delta CT}$	Std Error	Lower 95% CI of mean	Upper 95% CI of mean
0	1	0	1	1
1	0.87	0.05	0.64	1.09
2	1.02	0.10	0.57	1.47
6	0.92	0.09	0.53	1.32
24	0.92	0.14	0.30	1.55
