Appendix 1. Parameters describing the prevalence of salmonella feed materials and feed imported into Finland (proportion of 25 ton lots of imported feed contaminated), and the prevalence of salmonella in feed materials and feed manufactured (proportion of 25 ton lots of feed or feed material) in Finland in the current control scenario.

	Mean	sd	2.5 %	97.5 %
Imported feed or feed materials				
Sunflower	0.001595	0.002282	0.000002	0.008090
Whey	0.000133	0.000246	0.000000	0.000705
Pea	0.005112	0.007815	0.000006	0.026330
Oats	0.000093	0.000061	0.000015	0.000244
Milk	0.001103	0.001603	0.000001	0.005626
Barley	0.000062	0.000042	0.000010	0.000167
Brewer's yeast	0.001322	0.001886	0.000001	0.006714
Bean	0.001713	0.002470	0.000001	0.008657
Linen seed	0.021370	0.030260	0.000019	0.107400
Rank	0.000174	0.000383	0.000000	0.000929
Rapeseed, domestic origin	0.000239	0.000337	0.000000	0.001204
Rapeseed, imported	0.013670	0.002246	0.009862	0.018690

Imported complete feed for sows	0.037750	0.054050	0.000032	0.192800
Imported complete feed for pigs	0.038370	0.053360	0.000038	0.189900

¹ Parameter values in the table represent the true prevalence. Based on the data, apparent prevalence was estimated at 42% of the true prevalence. In addition, it was estimated that 11% of cases lead to the culling of the pigs due to *Salmonella* contamination.
