

Description of Additional Supplementary Files

File name: Supplementary Movie 1

Description: Formation of monolayer of PDECs from organoids. Organoids in Matrigel were transferred to a 35-mm dish following breaking down of the Matrigel. The plate was imaged using IncuCyte Zoom system (Essen Bioscience) in a cell culture incubator (5% CO₂, 37°C) and time lapse images were taken every 10 minutes for 26 hours.
