

SUPPLEMENTARY FIG. S2. Supplemental data of *CDH1* activation and cytotoxicity analysis in MIA-PaCa2 cells. **(A)** Detailed design of sgRNAs used for the activation of *CDH1*, related to Figures 2A and B. **(B)** Viability of the cells transfected with the vectors shown at the left. Data are shown as the mean \pm S.D. ($n=4$). **(C)** Dose response of the vectors transfected (50 ng vs. 100 ng in total), related to Figure 2E. Data are shown as the mean \pm S.D. ($n=4$). N.S., not significant.
