

SUPPLEMENTARY FIG. S3. Supplemental data of E-cadherin protein expression. **(A)** Blots for the detection of E-cadherin and α -tubulin proteins not shown in Figure 2G. Loaded protein mass is the same as Figure 2G. **(B)** Additional fluorescence images obtained in the immunostaining experiments not shown in Figure 2H. Filled and open triangles indicate E-cadherin/sfGFP- and E-cadherin-positive cells. Scale bars, 50 μ m.
