

### Supplementary File 1: Inter-coder reliability for intervention report coding

<b>Stage of coding</b>	<b>Index</b>	<b>Reliability</b>	<b># Papers coded before reliability achieved</b>
Screening	Kappa	0.9	22
BCT Coding	PABAK	0.9	93
Link Coding	Percentage Agreement	90%	183

*Note:* Since there was not a 'finite' number of possible MoAs, we used percentage agreement – and not Kappa – for links coding.
