

Description of Additional Supplementary Files

File name: Supplementary Data 1

Description: The impact of TCER-1 expression in individual tissues on the lifespan of wild-type animals as well as *tcer-1*, *glp-1* and *tcer-1;glp-1* mutants. TCER-1 was driven under control of (1A) *tcer-1* endogenous promoter (1B) intestine-specific promoter (1C) Neuron-specific promoter (1D) muscle-specific promoter and (1E) hypodermis-specific promoter.
