**FIGURE S12**

**S12 Fig.** Detection of protein expression. (A) Immunoblot analysis of proteins from TRV:EV (EV) and *NbBKI1*-silenced (BKI1si) *Nicotiana benthamiana* transiently expressing PvRXLR131-Flag, PvRXLR21-Flag, and GFP from the pGR106 vector. (B) Immunoblot analysis of proteins from *N. benthamiana* leaves transiently expressing GFP and PvRXLR131-GFP from the pBI121 vector. Ponceau-S (PS) stained rubisco large subunit serves as a loading control.
