Supplemental Figure 1. Heatmap of abundant OTUs abundance. Replicates and OTUs were clustered according to the Bray-Curtis distances. A total of 20 and 24 abundant OTUs were identified in 16S (A) and ITS (B) datasets, respectively. There are one and four unclassified OTUs at phylum (in 16S datasets) and order (in ITS datasets) level

A

Bacterial 16S rRNA

B

Fungal ITS
