

S3 Table. Overview over the number of times a drug was suspected to be related to hospitalization in 155 drug-related hospitalizations, ranked according to frequency (drugs associated 1 or 2 times are not included in the overview).

Drugs	Suspected relation with hospitalization, n
Metoprolol	39
Bumetanide	21
Zopiclone	15
Insulin and insulin analogues	13
Acetylsalicylic acid	11
Furosemide	
Oxazepam	10
Warfarin	
Atorvastatin	9
Enalapril	8
Oxycodone	
Simvastatin	
Buprenorphine	7
Formoterol/budesonide	
Escitalopram	
Codeine/paracetamol	6
Ipratropium bromide	
Isosorbide mononitrate	
Losartan	
Tramadol	
Amlodipine	5
Bisoprolol	
Glimepiride	
Glyceryl trinitrate	
Nifedipine	
Paracetamol	
Prednisolone	
Ramipril	
Salbutamol	
Calcium, combinations with vitamin D and/or other drugs	4
Citalopram	
Digoxin	
Lisinopril	
Metformin	
Methotrexate	
Nitrazepam	
Pantoprazole	
Rivaroxaban	
Zolpidem	
Chlorprothixene	3
Cortisone	
Hydrochlorothiazide	
Levothyroxine sodium	
Mycophenolic acid	
Solifenacin	
Spirolactone
