

Supplementary Data

SUPPLEMENTARY FIG. S1. Scatter plot of % change in fT3 (A) or fT4 (B) compared to % change in TRAb concentrations from baseline at week 18 (blue circle) and week 22 (red cross); and % change in fT3 (C) or fT4 (D) compared to % change in TSAb concentrations from baseline at week 18 (blue circle) and week 22 (red cross). For both fT3 and fT4 changes, there was a significant correlation with change in TRAb at weeks 18 and 22.
