

SUPPLEMENTARY FIG. S4. CD68 and CD163 expression correlate in ATC tumors. (A and B) Correlation of percentages of CD68⁺ and CD163⁺ cells as analyzed by (A) QuPath automated segmentation or (B) semi-quantitative analysis by microscopy. (C and D) Correlation of QuPath automated segmentation versus semi-quantitative microscopic analysis for the percentages of (C) CD68⁺ cells and (D) CD163⁺ cells.
