

**Supplemental Table 3. Primers used in RT-qPCR analysis**

<b>microRNA</b>	<b>Forward primer (5'-3')<sup>1</sup></b>
miSpike	CTCAGGATGGCGGAGCGGTCT
hsa-miR-30d-5p/bta-miR-30d	ACATCCCCGACTGGAAG
hsa-miR-125a-5p/bta-miR-125a	GAGACCCTTTAACCTGTGA
hsa-miR-423-5p/bta-miR-423-5p	GCAGAGAGCGAGACTTT

<sup>1</sup>Qiagen's miScript Universal Primer was used as reverse primer for all reactions. Human microRNA (miR) sequences are shown; miSpike is a synthetic, non-natural sequence.
