

S Table 1: Unit costs used to value resource use data collected from ART

Resource category	Unit cost (2016/17 GBP/£)	Assumptions and Source
Health care contact at follow-up		
GP clinic attendance	37.00	Unit Costs of Health and Social Care 2017 (section 10.3b). Per surgery consultation lasting 9.22 minutes.
Visits to practice nurse	14.47	Unit Costs of Health and Social Care 2017. Per patient contact lasting 15.5 minutes
Outpatient clinic attendance	128.72	NHS Reference Costs – Total Outpatient Attendance - Cardiology outpatient clinic (320).
Cardiac rehabilitation clinic attendance	72.96	NHS Reference Costs – Total Outpatient Attendance - Cardiac rehabilitation outpatient clinic (327).
Hospital re-admission bed day	305.85	NHS Reference Costs – Index - Non-elective inpatient excess bed day cost. Weighted average of all admission types.
Medications at follow-up (per day)		
Aspirin	0.01	75mg per day for duration of follow-up.
Clopidogrel	0.02	75 mg per day for a period of three months unless otherwise stated.
Warfarin	0.02	6mg per day for duration of follow-up.
Beta-blockers	0.01	Assumed drug is Biprosolol at 5mg per day for duration of follow-up.
Calcium-channel antagonists	0.01	Assumed drug is Amlodipine at 5mg per day for duration of follow-up.
Nitrates	0.07	Assumed drug is Isosorbide Mononitrate at 40mg per day for duration of follow-up.
Potassium channel activators	0.13	Assumed drug is Nicorandil at 40mg per day for duration of follow-up.
Statins	0.03	Assumed half of patients received Simvastatin at 40mg per day and half Atorvastatin at 80mg per day for duration of follow-up.
Other lipid lowering drugs	0.00	Assumed drug is Ezetimibe at 10mg per day -up.
ACE inhibitors	0.02	Assumed drug is Ramipril at 5mg per day.
Angiotensin-II antagonists	0.03	Assumed half of patients received Losartan at 100mg per day and half Candesartan at 32mg per day for duration of follow-up.
Diuretics	0.00	Assumed drug is Furosemide at 40mg per day for a period of four weeks after surgery.
Digoxin	0.02	250mcg per day for duration of follow-up.
Amiodarone	0.11	600mg per day for duration of follow-up.
Adverse events at follow-up requiring admission		
Myocardial infarction	2213.04	NHS Reference Costs – Non-elective inpatient - Actual or Suspected Myocardial Infarction (weighted average across CC scores) (EB10).
Cerebrovascular accident	3558.94	NHS Reference Costs – Non-elective inpatient - Cerebrovascular Accident, Nervous System Infections or Encephalopathy (weighted average across CC scores) (AA22).
Further CABG	9804.89	NHS Reference Costs – Non-elective inpatient – Complex / Major / Standard Coronary Artery Bypass Graft (weighted average across CC scores) (ED26/7/8).
Further PCI	3655.15	NHS Reference Costs – Non-elective inpatient – Complex / Standard Percutaneous Transluminal Coronary Angioplasty (weighted average across CC scores) (EY40/1).
Revascularisation with catheterisation only	3582.59	NHS Reference Costs – Non-elective inpatient - Complex / Standard Cardiac Catheterisation Angioplasty (weighted average across CC scores) (EY42/3).
Major bleed	5953.62	Assumed to require surgery for investigation and to incur the same cost as sternal wound infection requiring reconstruction.
Other adverse events	Various	Costed by associated length of hospital stay using the cost of a non-elective inpatient excess bed day (£305.85 per day).
Adverse events at follow-up without admission		
Myocardial infarction	521.99	NHS Reference Costs - Day case - Actual or Suspected Myocardial Infarction, General day case (weighted average across CC scores) (EB10).
Cerebrovascular accident	561.75	NHS Reference Costs – Day case - Cerebrovascular Accident, Nervous System Infections or Encephalopathy (weighted average across CC scores) (AA22).
Further PCI	1980.06	NHS Reference Costs– Day case - Complex / Standard Percutaneous Transluminal Coronary Angioplasty (weighted average across CC scores) (EY40/1).
Major bleed	5953.62	Assumed to require surgery for investigation and to incur the same cost as sternal wound infection requiring reconstruction.
Revascularisation with catheterisation only	1001.19	NHS Reference Costs– Day case - Complex / Standard Cardiac Catheterisation (weighted average across CC scores) (EY42/3).

Emergency investigations	258.38	NHS Reference Costs– A&E category 4 or 5 treatment (weighted average). Used as an estimate for day hospital cost for patients not admitted.
Theatre Resource Use		
Operating theatre time (per minute)	24.74	Average of theatre running costs (inclusive of staff) divided by theatre hours for cardiology at 8 boards in Scotland carrying out CABG (cardiac surgery).
Drugs for anaesthetic induction	4.81	Assuming 1mg Fentanyl , 5mg Midazolam, 1 amp (4mg) Pancuronium bromide
Muscle relaxant maintenance	9.03	Assuming 2 amps of Pancuronium bromide.
Inhalational anaesthetics (per minute)	0.00	Assuming Isoflurane at a concentration of 50% and fresh gas flow of 3 litres per min.
Consumables (all procedures)	416.25	Gray et al. 2017 inflated to 2016/17 prices using PSSRU HCS inflation index.
Additional consumables (on-pump procedures)	104.06	Gray et al. 2017 inflated to 2016/17 prices using PSSRU HCS inflation index.
Bypass machine time (per hour)	15.21	Machine purchase cost plus maintenance contract annuitised assuming a machine lifespan of 7 years and assuming a 3.5% discount rate. Annual usage of machine is assumed to be eight hours per day, five days per week.
Unit of red blood cells	120.00	Assuming 294ml mean volume per unit.
Unit of platelets	193.15	Assuming 297ml mean volume per unit.
Unit of fresh frozen plasma	28.46	Assuming 246ml mean volume per unit.
Unit of cryoprecipitate (pooled)	177.57	Assuming 187ml mean volume per unit
Laboratory issuing costs per blood product unit	2.08	Campbell et al. 2015 inflated to 2016/17 prices using PSSRU HCS inflation index.
Cell saver machine (per hour)	1.44	Machine purchase cost plus maintenance contract annuitised assuming a machine lifespan of 7 years and assuming a 3.5% discount rate. Annual usage of machine is assumed to be eight hours per day, five days per week.
Cell saver consumables	104.06	Gray et al. 2017 inflated to 2016/17 prices using PSSRU HCS inflation index.
Aprotinin (per dose)	333.37	Assuming one-off cost for 6 million Kallikrein Inhibitor Units intravenously; 2012/13 cost inflated to 2016/17 cost year using HCHS Inflation Index.
Post-theatre Resource Use		
Ventilator	37.78	Dasta et al. 2005 inflated to 2016/17 prices using PSSRU HCS inflation index.
Intra-aortic balloon pump plus pressure transducer (per insertion)	582.75	Gray et al. 2017 inflated to 2016/17 prices using PSSRU HCS inflation index.
Inotrope drug days		
Adrenaline	12.75	Assuming average dose of 0.08 mcg/kg/min, 4mg in total volume 50ml with 5% Dextrose
Noradrenaline	5.20	Assuming average dose of 0.05 mcg/kg/min, 4mg in total volume 50ml with 5% Dextrose.
Dobutamine	3.98	Assuming average dose of 6 mcg/kg/min, 250mg in total volume 50ml with 5%
Renal support therapy (per day)	328.38	NHS reference cost – Renal - Haemodialysis for Acute Kidney Injury, 19 years and over (LE01A)
Haemofiltration (single dose)		
Mannitol	6.15	Assumes a one off dose of 0.2-2g/kg intravenously.
Furosemide	0.09	Assumes a one off dose of 20-50mg intravenously.
Treatment of sternal wound infection		
Antibiotics for superficial SWI (per course)	10.32	Assuming antibacterial protocol of 1g Flucloxacillin IV 4 times daily for 2 days; and either 2g Flucloxacillin IV once daily, 500mg Cefalexin 3 times daily, or 450mg Clindamycin 3 times daily for 5 days.
Antibiotics for deep sternal wound infection (per course)	106.23	Assuming antibacterial protocol of 500mg Meropenem and 600mg iv for 3 doses, then 600mg Teicoplanin IV once daily, then 3 times daily for 7 days.
VAC Dressing (per episode)	303.44	Gray et al. 2017 inflated to 2016/17 prices using PSSRU HCS inflation index. Includes VAC canister, dressing and machine and assumes three applications. Costs provided by trial participating hospital.
Debridement procedures	2984.82	Assumed to require two hours of theatre time and prophylactic antibiotics. Time costed using theatre and anaesthetic drug costs
Surgical reconstruction	5953.62	Assumed to require four hours of theatre time and prophylactic antibiotics. Time costed using theatre and anaesthetic drug costs
SAEs during index admission		

Myocardial infarction	880.06	NHS Reference Costs – Non-elective inpatient - Actual or Suspected Myocardial Infarction (weighted average across CC scores) (EB10), less inpatient bed days costed using average excess bed day cost for the same currency code (weighted average across CC scores).
Cerebrovascular accident	1195.47	NHS Reference Costs – Non-elective inpatient - Cerebrovascular Accident, Nervous System Infections or Encephalopathy (weighted average across CC scores) (AA22), less inpatient bed days costed using average excess bed day cost for the same currency codes (weighted average across CC scores).
Further CABG	6794.63	NHS Reference Costs – Non-elective inpatient – Complex / Major / Standard Coronary Artery Bypass Graft (weighted average across CC scores) (ED26/7/8), less inpatient bed days costed using average excess bed day cost for the same currency codes (weighted average across CC scores).
Further PCI	2079.82	NHS Reference Costs – Non-elective inpatient – Complex / Standard Percutaneous Transluminal Coronary Angioplasty (weighted average across CC scores) (EY40/1), less inpatient bed days costed using average excess bed day cost for the same currency codes (weighted average across CC scores).
Cardiac catheterisation only	1607.76	NHS Reference Costs – Non-elective inpatient - Complex / Standard Cardiac Catheterisation Angioplasty (weighted average across CC scores) (EY42/3), less inpatient bed days costed using average excess bed day cost for the same currency codes (weighted average across CC scores).
Major bleed	5953.62	Assumed to require surgery for investigation and to incur the same cost as sternal wound infection requiring reconstruction.
Inpatient bed days		
Intensive Therapy Unit	624.96	NHS Reference costs - Critical care - weighted average across all unventilated critical care service codes (CCU01-91) (Currency code: XC07Z).
High Dependency Unit	385.03	Gray et al. 2017 inflated to 2016/17 prices using PSSRU HCS inflation index.
Cardiac Ward	348.44	NHS Reference costs - Non Elective Inpatients Excess Bed Days - Complex / Major / Standard Coronary Artery Bypass Graft (weighted average across CC scores) (ED26/7/8)
Post-hospital discharge		
Other hospital (per day)	348.44	Assumed same bed day cost as for cardiac ward above.
Nursing home (per day)	158.29	Unit Costs of Health and Social Care 2017 (section 1.3).
Rehabilitation unit (total cost)	2922.06	Unit Costs of Health and Social Care 2014 (section 1.6) inflated to 2016/17 prices using the PSSRU HCS inflation index. Assumes an average stay of 33 days.

S Table 2: Sensitivity analysis showing mean costs for a “Per protocol” analysis

S Table 3: Sensitivity analysis showing mean costs for a “available case” analysis

	Year 1 Mean cost		Year 2 Mean cost		Year 3 Mean cost		Year 4 Mean cost		Year 5 Mean cost		Total at year 5 Mean difference (95% CI, p value)
