

Reviewer Report

Title: SeQuiLa-cov: A fast and scalable library for depth of coverage calculations

Version: Original Submission **Date: 2/10/2019**

Reviewer name: Gianluigi Zanetti

Reviewer Comments to Author:

The paper is clear and well written. The algorithm proposed to compute coverage is straightforward but it leads to a very effective scalable implementation on Spark. Since the goal of the paper is to present a new tool, I suggest to expand the functionality section to provide readers with some details on what they need to do to use the tool in practice.
