

Supplementary Figure S2

Differential DNA methylation at the *PSMB8* locus. Box plots of DNA methylation levels for controls (n=400), patients with pSS stratified for anti-SSA/SSB negative pSS (n=25) and anti-SSA/SSB positive pSS (n=75) and patients with SLE (n=347) with a notch indicating the group median methylation β at cg12094903 and cg12048225 located within the *PSMB8*-TAP2 locus on chromosome 6.
