

Reviewer Report

Title: A high-quality genome assembly for the endangered golden snub-nosed monkey (*Rhinopithecus roxellana*)

Version: Revision 1 **Date: 5/15/2019**

Reviewer name: Jeff Kidd

Reviewer Comments to Author:

The revision is substantially improved and most of the concerns of the reviewers have been resolved. CNV analysis: (line 337). I think these are better termed duplications, not CNVs, as analysis of one sample does not show whether they are copy number variable in the population. Are the duplications found at the end of contigs? Were there any gene annotations present in the duplicated sequences.
