

Figure S2

Observed blood concentration of tacrolimus after LDLT patients in the model building data. Closed circle, open circle, closed triangle, and open triangle represent the observed blood concentration in patients with *CYP3A5**1 allele in both graft liver and small intestine (L*1/I*1), *CYP3A5**1 allele in graft liver and *CYP3A5**3/*3 in small intestine(L*1/I*3), *CYP3A5**3/*3 in graft liver and *CYP3A5**1 allele in small intestine(L*3/I*1), and *CYP3A5**3/*3 in both graft liver and small intestine(L*3/I*3), respectively. Red, green, blue, and purple lines show the median value in patients with L*1/I*1, L*1/I*3, L*3/I*1, and L*3/I*3, respectively.
