

Figure S1: Sigmoidal E_{max} curve for auranofin on *M. abscessus*. The fitted E_{max} was 212.01 log₁₀ cfu/mL*day, the EC₅₀ was 9.11x MIC and the estimated Hill slope was 0.63.

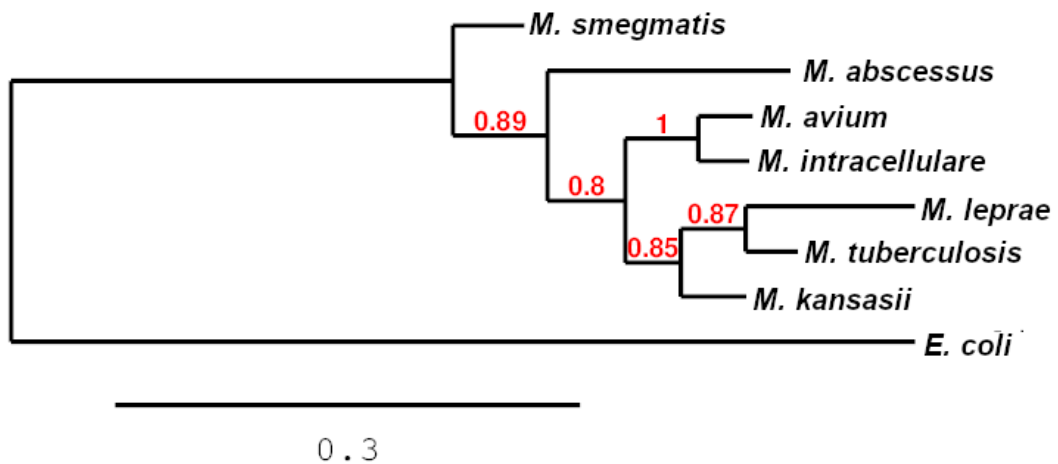

Figure S2: The calculated phylogeny tree for orthologs of TRX in different species of NTM, *M. leprae* and *M. tuberculosis*, as well as *E. coli*.
