

S4 Table. Calculation of CHA₂DS₂-VASc and modified HAS-BLED risk scores from variables in S3 Table

Risk score	Variable	Points
CHA ₂ DS ₂ -VASc	Congestive heart failure	1
	Hypertension	1
	Age ≥75 years	2
	Diabetes mellitus	1
	Previous ischemic stroke, TIA or systemic embolism	2
	History of acute myocardial infarction or atherosclerosis/peripheral vascular disease	1
	Age 65-74 years	1
	Female sex	1
Modified HAS-BLED	Hypertension	1
	Abnormal liver function	1
	Abnormal renal function	1
	Previous ischemic stroke, TIA or systemic embolism	1
	History of intracranial, gastrointestinal or other bleeding	1
	Age >65 years	1
	Concomitant use of NSAID, ASA or platelet aggregation inhibitor	1
	Alcohol misuse	1
