

Supplementary Materials: Supplementary materials can be found at www.mdpi.com/xxx/s1.

Figure S1. Zeta potential measurements of normal tooth protein (NP), dephosphorylated protein (DP) and deglycosylated protein (DG). The data represent the mean \pm standard error of three repeats.

Figure 2. FESEM micrographs of protein only control studies (absence of calcium phosphate). **A** shows protein molecules at 2 μ m scale. **B** shows the enlarged version at 1 μ m. The inset in **B** shows the details at 500 nm.
