Supplementary Table S1. Grading used for liver echography.

Parameter	−	+	++
Appearance of the liver echotexture	No difference between kidney and liver parenchyma	Mild discrepancy between liver and kidney parenchyma	Large discrepancy between liver and kidney parenchyma
Hepatic echo penetration	Liver parenchyma visible up to the diaphragm	Diaphragm not visible or presence of opacities	Diaphragm not visible and presence of opacities
Clarity of the hepatic blood vessels	Hepatic blood vessels clearly visible	Loss of echoes of hepatic blood vessels	Hepatic blood vessels not clearly visible
